The Republic of the Future , **The Nature of Tomorrow** Michael Rawson, 2021-11-16 An examination of how Western visions of endless future growth have contributed to the global environmental crisis For centuries the West has produced stories about the future in which humans use advanced science and technology to transform the earth Michael Rawson uses a wide range of works that include Francis Bacon s New Atlantis the science fiction novels of Jules Verne and even the speculations of think tanks like the RAND Corporation to reveal the environmental paradox at the heart of these narratives the single minded expectation of unlimited growth on a finite planet Rawson shows how these stories which have long pervaded Western dreams about the future have helped to enable an unprecedentedly abundant and technology driven lifestyle for some while bringing the threat of environmental disaster to all Adapting to ecological realities he argues hinges on the ability to create new visions of tomorrow that decouple growth from the idea of progress

The Palgrave Handbook of Utopian and Dystopian Literatures Peter Marks, Jennifer A. Wagner-Lawlor, Fátima Vieira, 2022-03-15 The

Palgrave Handbook of Utopian and Dystopian Literatures celebrates a literary genre already over 500 years old. Specially commissioned essays from established and emerging international scholars reflect the vibrancy of utopian vision and its resiliency as idea genre and critical mode. Covering politics, environment, geography, body and mind, and social organization, the volume surveys current research and maps new areas of study. The chapters include investigations of anarchism, biopolitics, and postcolonialism, and study film, art, and literature. Each essay considers central questions and key primary works, evaluates the most recent research, and outlines contemporary debates. Literatures of Africa, Australia, China, Latin America, and the Middle East are discussed in this global, cross-disciplinary and comprehensive volume. *The Future of the Book* Kevin J. Hayes, 2022. A short study of modern utopian American literature that shows how books were produced, distributed, and consumed in the US during the late nineteenth century, and the ways in which utopian novels written at this time reflected these processes in their imagined futures. **Victorian Visions of Suburban Utopia** Nathaniel Robert Walker, 2020. A study of British and American Utopian writing of the 1800s in the context of developments in real architectural, political, and cultural life. The book studies utopian visions published in the UK and the USA in the 1800s by writers such as Robert Owen, James Silk Buckingham, Edward Bellamy, and William Morris. **Finding List of the Apprentices' Library Established and Maintained by the General Society of Mechanics and Tradesmen of the City of New York** General Society of Mechanics and Tradesmen of the City of New York. Apprentices' Library, General society of mechanics and tradesmen of the city of New York, Library, 1888. *The Anthropocene Cookbook* Zane Cerpina, Stahl Stenslie, 2022-10-18. More than sixty speculative art and design projects explore how art, food, and creative thinking can prepare us for future catastrophes. In the Age of the Anthropocene, an era characterized by human-caused climate disaster, catastrophes and dystopias loom. The Anthropocene Cookbook takes our planetary state of emergency as an opportunity to seize the moment to imagine constructive change and new ideas. How can we survive in an age of constant environmental crises? How can we thrive? The Anthropocene Cookbook answers these questions by presenting a series of investigative art and design projects that explore how art, food, and creative thinking can prepare us for future catastrophes. This cookbook of ideas rethinks our eating habits and traditions, challenges our food taboos, and proposes new recipes for humanity's survival. These more than sixty projects propose new ways to think and make food, offering tools for creative action rather than traditional recipes. They imagine modifying the human body to digest cellulose, turning plastic into food, tasting smog, extracting spices and medicines from sewage, and growing meat in the lab. They investigate provocative possibilities: What if we made cheese using human bacteria, enabled human photosynthesis through symbiosis with algae, and brought back extinct species in order to eat them? The projects are diverse in their creative approaches and their agendas: multilayered, multifaceted, hybrid, and cross-pollinated. The Anthropocene Cookbook offers a survival guide for a future gone rogue, a road map to our edible futures. *Documents of the Senate of the State of New York* New York (State). Legislature. Senate, 1897.
