The topic frequency graph provides an overview of the most prevalent themes discussed by UK university students on Reddit over time. Notably, while the chart shows an increasing trend for all topics as the subreddit grows, it particularly highlights Topic 4 (Mental Health), becoming the most prominent in the later years. This aligns with the broader societal focus on mental health awareness. Additionally, the chart shows the relative prevalence of each topic over time. Among the top topics, we find a mix of academic concerns (e.g., accommodation, university applications), social aspects (e.g., finding friends, loneliness), and personal well-being (e.g., mental health, finance). First, the prominence of topics such as job, university choice and application, accommodation and finance highlight the practical challenges that students face in their university journey. Secondly, students use such social media platforms as an avenue of seeking help and advice from other UK university students who have experienced similar concerns. These discussions not only provide valuable peer-to-peer support but also offer insights into the common struggles and decision-making processes of students.
