Cookson, 2024-04-23 An evidence based plan of action to achieve educational justice for K 12 public school students from families whose income is 50% or more below the US poverty threshold *Primary School English-Language Education in Asia* Bernard Spolsky, Young-in Moon, 2013-03-05 In Asia English is no longer a foreign language but a key resource for education government business and the general public Whereas thirty years ago British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level Asian nations as well as European are now introducing English in primary school But there are major obstacles to overcome the training of enough local teachers or the hiring of English speakers the preparation of suitable teaching materials the development of useful tests and the design of workable curriculums The chapters in this book written by leading English teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi Vietnam describe and analyze national policies and how they are implemented The coverage is wide China with its huge number of students learning English Japan working to make the transition from elementary to secondary school seamless Singapore continuing to use English as medium of instruction for its multilingual population Korea developing English education policies to recognize the increased role of English alongside the national language India building on its colonial past to make English an economic resource Vietnam fitting English into a program of national rebuilding and Taiwan spreading its English teaching outside the national capital This is not a report of the views of outside experts but of local experiences understood by local scholars of international standing Policy makers educators researchers and scholars will be able to gain valuable insights from Asian experts Researching Early Childhood Literacy in the Classroom Lucy Henning, 2019-11-05 This volume demonstrates how the ethnographic approach to research demanded by a Literacy as Social Practice perspective can generate fresh insights into what happens when young children engage with schooled literacy tasks Researching Early Childhood Literacy in the Classroom argues that the lived experience of young children encountering formal schooled literacy curricula should be the foremost consideration in educational reforms intended to improve rates of literacy acquisition in schools To make this

argument the author suspends traditional concerns with learning and progress to concentrate on practice and meaning in a careful analysis of key classroom incidents The author concludes that such insights suggest a need for re considering the assumptions upon which educational policy rests This book will be of great interest to graduate and postgraduate students researchers academics and libraries in the fields of Literacy Studies Teacher Education Education Policy and Applied Linguistics

The A-Z of Great Classrooms Roy Blatchford, 2023-04-14 The A Z of Great Classrooms is a celebration of that magical double act of teaching and learning organised around the 26 letters of the English alphabet Over the past twenty years as a reviewer and inspector of schools and colleges in the UK and across the world Roy Blatchford CBE has visited over 15 000 lessons in more than 1 000 settings In this book he seeks to distil what happens in classrooms where learners are engaged and excited by what the skilled and knowledgeable teacher presents weaving in examples analysis and personal reflections Roy Blatchford notes in the introduction Across continents I have enjoyed being in the presence of children young people and adults being taught by teachers who love their work and whose passion for subject shines through their every gesture and every word The best lessons you just don t want them to end And there s nothing quite like the professional privilege of being in such classrooms laboratories dance studios workshops music practice rooms sports halls libraries learning centres sensory zones outdoor settings lecture theatres wherever the learning unfolds In Section One readers will form their own views about whether the A Z alphabetical headings impose an editorial strait jacket when teaching and learning are such dynamic affairs An extended Venn diagram or a series of linked Olympic rings might well be a richer way of presenting the complexities intricacies and flow of classrooms The Foreword is by Rebecca Boomer Clark CEO of Academies Enterprise Trust
