Right Stuff, Wrong Sex Margaret A. Weitekamp, 2004-10-18 Book Review **The Schenley Sports Encyclopedia** Frank Grant Menke, 1953 *Spirit Cure* Joseph W. Williams, 2013-02-14 Joseph W Williams examines the changing healing practices of pentecostals in the United States over the past 100 years from the early believers to the later generations of pentecostals and their charismatic successors *Slash Pine Cache* University of Florida, 1959 *Collaborative Imagination* Paul Feigenbaum, 2015 Processes of fighting unequal citizenship have historically prioritized literacy education through which people envision universally first class citizenship and devise practical methods for enacting this vision Collaborative Imagination explores how literacy education can facilitate activism amid contemporary contexts in which citizenship is officially equal but in practice underserved populations often remain consigned to second class status *The Encyclopedia of Sports* Frank Grant Menke, 1953 *Cosmonaut* Cathleen S. Lewis, 2023-08-08 Examining material and cultural representations of the cosmonaut program Cathleen Lewis discusses how the public image of the Soviet cosmonaut developed beginning in the 1950s and the ways this icon has been reinterpreted throughout the years and in contemporary Russia **Developments and Challenges for Autonomous Unmanned Vehicles** Anthony Finn, Steve Scheding, 2010-03-17 It is widely anticipated that autonomous vehicles will have a transformational impact on military forces and will play a key role in many future force structures As a result many tasks have already been identified that unmanned systems could undertake more readily than humans However for this to occur such systems will need to be agile versatile persistent reliable survivable and lethal This will require many of the vehicles cognitive or higher order functions to be more fully developed whereas to date only the component or physical functions have been successfully automated and deployed The book draws upon a broad range of others work with a view to providing a product that is greater than the sum of its parts The discussion is intentionally approached from the perspective of improving understanding rather than providing solutions or drawing firm conclusions Consequently researchers reading this book with the hope of uncovering some novel theory or approach to automating an unmanned vehicle will be as disappointed as the capability planner who anticipates a catalogue of technical risks and feasibility options against his favoured list of component technologies and potential applications Nevertheless it is hoped that both will at least learn something of the other s world and that progress will ensue as a result For the defence policy and decision maker this is a must read book which brings together an important technology summary with a considered analysis of future doctrinal legal and ethical issues in unmanned and autonomous systems For research engineers and developers of robotics this book provides a unique perspective on the implications and consequences of our craft connecting what we do to the deployment and use of the technology in current and future defence systems Professor Hugh Durrant Whyte **Congressional Record** United States. Congress, 1998 *The Selected Letters of Mary Moody Emerson* Mary Moody Emerson, 1993 Scholars have long recognized that Mary Moody Emerson 1774 1863 had a vital

influence on the intellectual development of her nephew Ralph Waldo Emerson during his most formative years. The extent of that influence and the quality of Mary Emerson's own mind are apparent however only through her extensive correspondence spanning seventy years. *The Selected Letters of Mary Moody Emerson* makes available for the first time this important collection of letters within the Emerson family papers and firmly establishes Mary Emerson as a woman of strong and independent mind. Moreover, as Emerson himself realized, his aunt's letters reveal much about the political, social, and religious concerns that dominated her age, the critical period from the American Revolution to the Civil War. Mary Emerson rejoiced in what she called a period of wonderful revolutions and through her correspondence engaged actively in the disputes of the time. During these years the new Constitution was tried and tested most severely by slavery and the Civil War, but also by the War of 1812, the rapid expansion westward, and the increasingly materialistic and capitalistic pursuits of the American people. These letters contain wide references to the people, events, and controversies of the period. They also reveal the impact of changing conditions on an individual woman, a woman of curiosity and self-reliance who sought to define herself in a patriarchal culture. Ralph Waldo Emerson once commented that in her prime Mary Emerson was the best writer in New England. The letter became her art form and she managed to transform it into a vehicle for free discussion. Her many correspondents, fifty-five in all, included her Emerson nephews William Waldo, Edward, and Charles, as well as Charles's fiancée Elizabeth Hoar and Sarah Alden Bradford Ripley. For this edition, Nancy Simmons has chosen some 333 letters that represent the contours of Mary Emerson's life and thought. A valuable contribution to literary, historical, religious, and feminist scholarship, *The Selected Letters of Mary Moody Emerson* recovers from the footnotes of literary history a woman of considerable intellectual influence.
