[Reading and Writing for Pleasure](#) Teresa Cremin, Helen Hendry, Liz Chamberlain, Samantha Jayne Hulston, 2025-09-12 Reading and writing for pleasure represent issues of global concern and interest in policy research and practice underpinned by evidence illustrating their importance for young people s academic social and emotional experiences and outcomes In the face of a sustained decline in children s enjoyment in both reading and writing this highly significant book presents findings from a three year study of research and

practice that nurtures young people's engagement as readers and writers. The book offers a rich understanding of the study highlighting the commonalities and synergies identified from the research literature and diverse practice contexts. The authors offer practical strategies and recommendations throughout for practitioners, researchers and policy makers who wish to advance this agenda in their own contexts. Areas covered include: The nature of reading and writing for pleasure; Literate identities; Motivating readers and writers; Social interactions; Role models and connected communities; Future research practice and policy. Handbook of Creativity John A. Glover, Royce R. Ronning, Cecil R. Reynolds, 2013-03-09. The motivation underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes. Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference. Instead, this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program. See Brown Chapter 1. The handbook grew out of a series of discussions that spanned several years. At the heart of most of our interactions was a profound unhappiness with the state of research on creativity. Our consensus was that the number of good works published on creativity each year was small and growing smaller. Further, we could not point to a journal, text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity. At the same time, we were casting about for a means of honoring a dear friend, E. Paul Torrance. Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views.
