Foreign Media Content Ulrike Rohn,2009 What media content attracts audiences across cultures and what does not What does the cross cultural audience demand depend on The author takes a new approach to understanding cultural barriers to the success of foreign media content by analyzing the entry strategies of Time Warner Disney Viacom News Corporation and Bertelsmann with regard to China India and Japan in terms of their respective localization efforts In depth interviews with

companies representatives give an insight into how they view the need for locally produced media in these countries The author develops and employs the Lacuna and Universal Model that provides a new theoretical classification of reasons for the cross cultural success and failure of media content as well as the Vertical Barrier Chain that locates cultural barriers in the wider context of legal political and economic barriers to successful entry into foreign media markets **Fame India Awards (October Magazine)** Fame India Network, Writers Corner Publication, 2023-11-03 Fame India Magazine is the Second edition of Fame India Awards 2023 The Top 13 Participants are the Deserving Awardees chosen under different categories *"A Sociological Study of Patterns of Televiewing"* Dr. BABAN M. CHOUDHARI (Researcher) ,Dr. (Mrs) SUNANDA BIRE (Supervisor), During the past decade the number of television receivers per home has skyrocketed with many children each having a TV set in their bedroom Through cable and satellite access families have a choice of a hundred or more channels most broadcasting twenty four hours a day The videotape recorder has enabled viewers to delay watching or to rewatch television programs at any time and thereby shift the traditional viewing hours to virtually any time of the day The research studies directed at these phenomena have confirmed however that little effect has been seen in children s viewing habits There was simply more of the same programming fare and it was available through a broader time frame The distribution of television sets into various areas of the home and the less traditional hours of availability have if anything reduced the opportunities for parental coviewing and control The V chip was predicted to enhance the ability of parents to exercise such control but appears to have been a failure with many parents not even aware of the existence of such a device
