A fascinating blend of biology, philosophy, and economics, the book outlines a formidable and compelling set of ideas that places mankind at the center of an epic evolutionary event. An event that the author believes could lead to a transformation of the world as we know it. By stepping back and analyzing such contemporary issues as environmental sustainability, space exploration, the spread of information technology, and the role of religion in modern society from the long-term perspective of the entire history of life, the author reaches some remarkable conclusions concerning the significance of recent events and what they portend for the future. In a profoundly optimistic assessment, the reader is methodically guided toward a fascinating vision of the future that is both inspiring and somewhat unsettling. The author, Jon Beach, is both a researcher and published author in the field of evolutionary biology and an active entrepreneur in the world of business. From this combination of viewpoints comes a unique and surprising perspective on the human condition.
