The Challenge Of Urban Government Policies And Practices Wbi Development Studies:

The Challenge of Urban Government Mila Freire, Richard E. Stren, 2001-01-01 Cities and towns are vital for the development of economic systems and social organisations However cities face tremendous challenges They have to simultaneously attract business provide a good livelihood for their inhabitants generate enough resources to finance infrastructure and social needs and take care of their poor The Challenge of Urban Government Policies and Practices looks at the consequences of globalisation on city management This book focuses on the complex of issues generated in urban areas such as the dynamics of metropolitan spaces and the need to define strategic territory for operational and policy purposes Some urgent challenges include how to handle spillovers across municipalities and the need to create a new city structure over an existing city to give the suburbs some elements of centrality It examines the dynamics of governance and how to get stakeholders participation in the government process Economic Analysis of Investment Operations Pedro Belli, 2001-01-01 This books presents general principles and methodologies of quantitative risk analysis provides theory and practice of how to evaluate health transport and education projects and describes how to assess the environmental impact of projects It looks at how the tools of cost benefit analysis can be applied from the point of view of the private sector public sector bankers and the country as a whole It encourages analysts to answer a number of key questions that are likely to increase success rather than simply describing techniques This book as aimed at all concerned with resource allocation and is presented in an accessible fashion It is required reading at World bank Institute courses Water and Post-Conflict Peacebuilding Erika Weinthal, Jessica J. Troell, Mikiyasu Nakayama, 2014-02-24 As a basic human need the provision of safe water is among the highest priorities of government and humanitarian interventions during post conflict recovery and peacebuilding In the aftermath of war water sanitation and infrastructure play a critical role in the recovery of livelihoods and economic development Moreover shared waters have great potential for interstate cooperation assisting to rebuild trust following conflict and to prevent a return to conflict This volume draws on studies from around the world to create a framework for understanding how water resources decisions and activities can facilitate or undermine peacebuilding in a post conflict setting **New Urban Agenda in Asia-Pacific** Bharat Dahiya, Ashok Das, 2019-05-04 This book explores significant aspects of the New Urban Agenda in the Asia Pacific region and presents from different contexts and perspectives innovative interventions afoot for transforming the governance of 21st century cities in two key areas i urban planning and policy and ii service delivery and social inclusion Representing institutions across a wide geography academic researchers and development practitioners from Asia Australia Europe and North America have authored the chapters that lend the volume its distinctly diverse topical foci Based on a wide range of cases and intriguing experiences this collection is a uniquely valuable resource for everyone interested in the present and future of cities and urban regions in Asia Pacific

Private Sector Involvement in Urban Solid Waste Collection Sampson Oduro-Kwarteng, 2011-09-28 The private

sector involvement in public service is intended to achieve efficiency gain and better service quality through increasing private sector finance and expertise. However, these benefits are most often not achieved in developing countries due to investment risk of private finance and problems of capacity and regulation of the private sector. This book examines private sector involvement (PSI) in solid waste collection by exploring the influence of private sector capacity and Local Governments' regulations on private sector performance in terms of productivity and service quality. PSI in public service provision evolved to deal with market and government failures, so this study uses market and regulatory theories to explore the gaps in policy and practice of PSI and the factors explaining private sector performance in five cities in Ghana. The study shows there were weak regulatory practices and non-adherence to contractual obligations, unsigned contracts, and delayed payment of subsidy, which consequently led to disincentives for full cost recovery and better service quality. However, there is now a gradual well-functioning system being put in place with the recent competitive bidding in two cities with signing of contracts and city-wide user charging. This study concludes that the solutions to the problem of solid waste collection and management in developing countries hinge on adherence to formal rules of regulation, use of appropriate cost recovery mechanisms for low-income groups, and restructuring of institutional arrangements to enforce legislation.

Municipal Solid Waste Management

Hosam El-Din Saleh, 2019-07-24. Rapid population growth, high standards of living, and technological development are constantly increasing the diversity and quantity of solid waste. The production of solid municipal waste associated with the high proportion of organic waste and its improper disposal leads to considerable environmental pollution due to the emission of greenhouse gases such as methane, carbon dioxide, etc. In such a challenging environment, municipal authorities need to develop more effective solutions to manage the growing urban solid waste. Most of the municipal solid waste mainly constitutes degradable materials which represent a significant role in greenhouse gas emissions in urban localities. Integrated solid waste management approaches must be developed and improved to manage the increasing organic fractions of municipal solid waste which helps to reduce greenhouse emissions with potential economic benefits. A sustainable management of municipal solid waste systems constitutes a promising and attractive trend to study current consumption behaviors responsible for waste generation and to protect the global ecosystem. This book presents the management of municipal solid waste including recycling and landfill technologies. Moreover, composition and types of waste will be investigated. As a result, the most appropriate and feasible scenarios for the management of municipal solid waste are presented to provide the respected readership with the scientific background for sustainable development in these processes which are increasingly supported by innovative methodologies for holistic assessment of process sustainability.

Accounting for Poverty in Infrastructure Reform Antonio Estache, Vivien Foster, Quentin Wodon, 2002. Annotation: This book provides practical guidelines and options for infrastructure reform that result in access and affordability for the poor.
