The Civic Culture Of Local Economic Development:

The Civic Culture of Local Economic Development Laura A. Reese, Raymond A. Rosenfeld, 2002 The focus on economic development policy provides a window on local decision making and allows for the development of a theory introduced by the authors about the role of local civic culture in framing local decisions of all types This ultimately provides a theoretical vehicle for categorizing cities and predicting policy outcomes *The Civic Culture of Local Economic Development* Laura A. Reese, 2001 Using survey and case study data from US and Canadian cities this work makes the case that different cultures will produce different types of economic development policies and that local civic culture will affect the whole array of local policies **Civic Culture and Local Economic Development in a Small Town** Deidre Van Rooyen, 2013 *Comparative Civic Culture* Laura A. Reese, Raymond A. Rosenfeld, 2016-05-23 The quest for a theoretical framework for understanding urban policy making has been a recurring focus of research into local governments Civic culture is a means for understanding how municipal policy makers weigh the interests of different groups govern the local community frame local goals engage in decision making and ultimately select and implement public policies While it seems that culture matters in local policy making how to measure culture in a valid and replicable fashion presents a significant challenge which the authors address in this book They present their findings of a large multi city research project to explore the nature of civic culture in cities in the US and Canada The focus of their analysis is on three overarching systems of community power system the community value system and the community decision making system The authors address a number of questions around the nature of civic culture and the relationships between the three systemic elements of civic culture to refine and apply a more sophisticated theory of urban policy making Critical Evaluations of Economic Development Policies Laura Ann Reese, David Fasenfest, 2004 This ground breaking text offers alternative models for critical evaluation of the values behind and the success of local level economic development policies The values that shape present day economic development policies are often not plainly expressed Critical Evaluations of Economic Development Policies shows how the use of nontraditional methods of evaluation can foreground the values that inform public policy and determine whether or not those values and the policies that arise from them are in the best interests of the community that adopts them The methodology defined in this book not only provides means for judging the success or failure of economic development programs but also offers tactics for judging how well policies address needs according to a community's own value system The essays in Critical Evaluations of Economic Development Policies establish critical models illustrate how such models may be applied and show how evaluations of a single program made from the perspectives of differing value systems lead to different conclusions about the success or failure of the program In doing so these essays demonstrate the crucial importance of continuing dialogue between those who make policies and those who assess them This dynamic collection proposes to stimulate discussion among scholars developers and urban administrators to build awareness of the ways to

foster completely informed policies and evaluate their outcomes Developing Locally Beer, Andrew, Haughton, Graham, Alaric Maude, 2003-11-26 This work offers comparisons of local and regional economic development organisations objectives activities and effectiveness across four English speaking nations **Developing Locally** , *Comparative Metropolitan Policy* Jen Nelles, 2012-02-20 How are metropolitan regions governed What makes some regions more effective than others in managing policies that cross local jurisdictional boundaries Political coordination among municipal governments is necessary to attract investment rapid and efficient public transit systems and to sustain cultural infrastructure in metropolitan regions In this era of fragmented authority local governments alone rarely possess the capacity to address these policy issues alone This book explores the sources and barriers to cooperation and metropolitan policy making It combines different streams of scholarship on regional governance to explain how and why metropolitan partnerships emerge and flourish in some places and fail to in others It systematically tests this theory in the Frankfurt and Rhein Neckar regions of Germany and the Toronto and Waterloo regions in Canada Discovering that existing theories of metropolitan collective action based on institutions and opportunities are inconsistent the author proposes a new theory of civic capital which argues that civic engagement and leadership at the regional scale can be important catalysts to metropolitan cooperation The extent to which the actors hold a shared image of the metropolis and engage at that scale strongly influences the degree to which local authorities will be willing and able to coordinate policies for the collective development of the region *Metropolitan Governance and Policy* will be of interest to students and scholars of comparative urban and metropolitan governance and sociology *Custodians of Place* Paul G. Lewis, Max Neiman, 2009-03-13 *Custodians of Place* provides a new theoretical framework that accounts for how different types of cities arrive at decisions about residential growth and economic development Lewis and Neiman surveyed officials in hundreds of California cities of all sizes and socioeconomic characteristics to account for differences in local development policies This book shows city governments at the center of the action in shaping their destinies frequently acting as far sighted trustees of their communities They explain how city governments often can insulate themselves for the better from short term political pressures and craft policy that builds on past growth experiences and future vision Findings also include how conditions on the ground local commute times housing affordability composition of the local labor force play an important role in determining the approach a city takes toward growth and land use What types of cities tend to aggressively pursue industrial or retail firms What types of cities tend to favor housing over business development What motivates cities to try to slow residential growth *Custodians of Place* answers these and many other questions **The Oxford Handbook of Urban Politics** Karen Mossberger, Susan E. Clarke, Peter John, 2015 The Oxford Handbook of Urban Politics is an authoritative volume on an established subject in political science and the academy more generally urban politics and urban studies The editors are all recognized experts and are well connected to the leading scholars in urban politics The handbook covers the

major themes that animate the subfield the politics of space and place power and governance urban policy urban social organization citizenship and democratic governance representation and institutions approaches and methodology and the future of urban politics Given the caliber of the editors and proposed contributors the volume sets the intellectual agenda for years to come
