Peter Hillary, John E. Elder

The Coldest March Scotts Fatal Antarctic Expedition:

Coldest March Susan Solomon, 2013-05-09 The Coldest March tells the tragic story of Captain Robert Falcon Scott and his British team who in November 1911 began a trek across the snows of Antarctica striving to be the first to reach the South Pole After marching and skiing more than nine hundred miles the men reached the Pole in January 1912 only to suffer the terrible realisation that a group of five Norwegians had been there about a month earlier Scott and his four companions died on the return journey Whether they were courageous heroes or tragic incompetents has been debated ever since Susan Solomon brings a scientific perspective to her understanding of the men of the expedition their agonising struggle and the reasons for their deaths Drawing on extensive meteorological data and on her personal knowledge of the Antarctic she depicts in detail the sights sounds legends and ferocious weather of that singular place She reaches the startling conclusion that the polar party was struck down by exceptionally frigid weather a rare misfortune that confounded the men s meticulous predictions of what to expect This poignant and beautifully written book restores Scott and his men to the place of honour they deserve

The Coldest March Susan Solomon (Atmospheric chemist), 2003 Captain Scott: Icy Deceits and Untold Realities Krzysztof Sienicki, 2016-11-01 This expertly written book is nothing less than a daring challenge to the prevailing views of Captain Robert F Scott s journey to the South Pole and consequent disaster Borrowing from various scientific disciplines Krzysztof Sienicki lucidly argues against each of the presumed causes of Captain Scott and his companions deaths In particular he demolishes the notions of extreme low temperatures ferocious winds and food fuel shortages as the main causes of the disaster Using neural network computer simulations he proves that the Extreme Cold Snap Never Ending Gale and food fuel scarcity never occurred By eliminating the alleged causes of the disaster the author provides data and arguments that the deaths Scott Wilson and Bowers were a matter of choice rather than fate The choice was made long before there was an actual end of food fuel and long before the end of the physical strength needed to reach delusive salvation at One Ton Depot

Quest for Antarctica John F. Barell, 2011-07-13 Antarctica fools you into thinking you are safe that appearances are reality Antarctica is not what she seems Since he was thirteen years old author John Barells life long and life enriching dream has been to sail to Antarctica and explore its wild and expansive territories Quest for Antarctica A Journey of Wonder and Discovery recounts Barells Antarctic adventure that is not only captivating but also educational Fostered by knowing Americas foremost polar explorer Rear Admiral Richard E Byrd and with strong family support Barells dream continues south to McMurdo Sound and to the two mile thick polar plateau Follow Barells expeditions including becoming a teacher and learn how all of the survival lessons of Antarctica apply to striving for our own goals and being successful

Developing More Curious Minds John Barell, 2003-02-15 After the September 11 attacks on the World Trade Center and Pentagon many people questioned why no one had anticipated the terrorists acts even when events and intelligence seemed to point toward them John Barell wonders if the attacks speak to a greater societal problem of

complacency He believes many students have become too passive in their learning accepting information and facts as presented in textbooks classes and the media Drawing on anecdotes from educators and his own life Barell describes practical strategies to spur students ability and willingness to pose and answer their own questions Antarctica expeditions outer space discoveries dinosaur fossils literature and more help define the importance of developing an inquisitive mind using such practices as Maintaining journals on field trips Using questioning frames and models when reading texts Engaging in critical thinking and problem based learning and Integrating inquiry into curriculum development and the classroom culture To become habits of mind students daily curiosities must be nurtured and supported Barell draws a vivid map to guide readers to an intelligent revolution in which schools can become places where educators and students imagine and work together to become active citizens in their society Note This product listing is for the Adobe Acrobat PDF version of the book *The Gates of Hell* Andrew D. Lambert, 2014-05-14 From one of our foremost naval historians the compelling story of the doomed Arctic voyage of the HMS Erebus and the HMS Terror commanded by Captain Sir John Franklin Andrew Lambert a leading authority on naval history reexamines the life of Sir John Franklin and his final doomed Arctic voyage Franklin was a man of his time fascinated even obsessed with the need to explore the world he had already mapped nearly two thirds of the northern coastline of North America when he undertook his third Arctic voyage in 1845 at the age of fifty nine His two ships were fitted with the latest equipment steam engines enabled them to navigate the pack ice and he and his crew had a three year supply of preserved and tinned food and more than one thousand books Despite these preparations the voyage ended in catastrophe the ships became imprisoned in the ice and the men were wracked by disease and ultimately wiped out by hypothermia scurvy and cannibalism Franklin s mission was ostensibly to find the elusive North West Passage a viable sea route between Europe and Asia reputed to lie north of the American continent Lambert shows for the first time that there were other scientific goals for the voyage and that the disaster can only be understood by reconsidering the original objectives of the mission Franklin commonly dismissed as a bumbling fool emerges as a more important and impressive figure in fact a hero of navigational science *The Ice and the Inland* Brigid Hains, 2002 An elegant original and very well written book luminous with meaning full of superb cameos and suggestive arguments the central figures are both charismatic articulate and iconic they are central to any estimation of twentieth century Australian cultural and environmental history Dr Tom Griffiths Australian National University This is a path breaking work the environmental aspect of the work is powerful and there are some wonderful ideas about what is civilised and what is wilderness Brigid Hains has reinvigorated the tradition of frontier studies Dr Jane Carruthers University of South Africa The frontier mythology of the early twentieth century laid the groundwork for the wilderness cult of contemporary Australian life It became etched in the Australian imagination through the image of folk heroes such as Douglas Mawson and John Flynn promising national renewal through virile heroism and an encounter with wild nature Most frontier histories in Australia have focused on race relations

this is among the first to focus on the frontier as an ecological phenomenon It draws on rich primary sources many of which have never been published including Antarctic diaries and the letters and journalism of John Flynn In this superb account Brigid Hains offers a new interpretation of two Australian folk heroes and their iconic status in Australian culture a fresh approach to frontier history that focuses on the landscape rather than on racial conflict and an explanation of the origins of wilderness conservation in Australia Mawson s Antarctic exploration and Flynn s Australian Inland Mission both drew on imperial and trans Pacific influences such as imperial adventure literature the cult of polar exploration the rural life movement population theory and eugenics The Ice and the Inland compares these two Australian folk heroes and analyses the reasons for their popularity It raises a number of topical issues including the role of Australia in the international management of Antarctica Flynn s treatment of Aboriginal people the reasons for conservation of Australia s wild places from the arid Centre to the frozen wastes of Antarctica and relationships between the country and the bush and between the metropolis and the frontier

In the Ghost Country Peter Hillary, John E. Elder, 2003-12-30 A reflective memoir by a world famous explorer delves into the astonishing adventures of his career including his trips to the Himalayas the Andes the Arctic and an almost fatal trip to the South Pole

Essentials of Autopsy Practice Guy N. Rutty, 2003-11-19 Essentials of Autopsy Practice updates the modern pathologist on issues related to the autopsy This volume contains topical chapters on the pathology of shock religious attitudes to death incised wounds radiological investigations metabolic disorders in childhood maternal deaths body alterations and piercings which are comprehensive unique and educational It brings the literature together into a modern up to date review of the subject each authored by experts in their field It comprises the most recent developments in current autopsy practice making the book unique and exceptional a valuable aid for the bench top autopsy suite laboratory or library A hands on reference book Essentials of Autopsy Practice is of interest to both trainees and consultants in all sub branches of pathology including forensic pathology It can also be used by non medical staff involved in the dead such as nurses police lawyers and bereavement officers

On the Backs of Others Edward Armston-Sheret, 2024 In the Victorian and Edwardian eras British explorers sought to become respected geographers and popular public figures downplaying or reframing their reliance on others for survival Far from being solitary heroes these explorers were in reality dependent on the bodies senses curiosity and labor of subaltern people and animals In *On the Backs of Others* Edward Armston Sheret offers new perspectives on British exploration in this era by focusing on the contributions of the people and animals ordinarily written out of the mainstream histories who made these journeys possible He explores several well known case studies of enduring popular and academic interest such as Richard Francis Burton and John Hanning Speke s Nile expeditions 1856-59 and 1860-63 Isabella Bird s travels in North America Persia and East Asia 1872 c 1900 and Captain Robert Falcon Scott s two Antarctic expeditions 1901-4 and 1911-13 Armston Sheret argues that numerous previously ignored stories show the work and agency of subaltern groups In rethinking the history of exploration *On the Backs of Others*

offers the first book length study of the relationship between exploration and empire and their legacies within academic geography
