

The Century of Revolution, 1603-1714

CHRISTOPHER HILL

The years between 1603 and 1714 were perhaps the most decisive in English history. During this period modern English society and a modern state began to take shape, and England's position in the world was transformed.

The Century of Revolution tries to penetrate below the familiar events to grasp what happened—to ordinary English men and women as well as to kings and queens or abstractions like “society” and “the state.”

The first edition of *The Century of Revolution* was published by Norton in 1966 as part of the Norton Library History of England. It has established itself as a classic and the outstanding book of the series. In this new edition, Dr. Hill includes the most important conclusions of valuable research over the last twenty years and has added postscripts drawing attention to especially significant books.

Christopher Hill was for many years tutor and then Master of Balliol College, Oxford. He is now Visiting Professor at the Open University. His published works include *The English Revolution, 1640; Economic Problems of the Church; Puritanism and Revolution; Society and Puritanism in Pre-Revolutionary England; Intellectual Origins of the English Revolution; Reformation to Industrial Revolution; God's Englishman: Oliver Cromwell and the English Revolution; Antichrist in Seventeenth-Century England; The World Turned Upside Down: Radical Ideas during the English Revolution; Change and Continuity in Seventeenth-Century England; and Milton and the English Revolution.*
