and intensity of global integration in the last two decades have provoked serious debate about the human impact of globalization and deep concern about the capacity of the state to provide social justice Street Protests and Fantasy Parks focuses on two dimensions of globalization the cultural and social realities of global connection and the uneasily shifting role of the state While global processes are fusing societies and economies more deeply than ever before the editors argue that obituaries for the state are premature if not wholly inappropriate These essays examine a series of compelling case studies the entertainment industry citizenship social activism and wired communication to assess the choices states have and the consequences of those choices for culture and society **Routledge Handbook of Art, Science, and Technology**

Studies Hannah Rogers, Megan Halpern, Dehlia Hannah, Kathryn de Ridder-Vignone, 2021-12-22 Art and science work is experiencing a dramatic rise coincident with burgeoning Science and Technology Studies STS interest in this area Science has played the role of muse for the arts inspiring imaginative reconfigurations of scientific themes and exploring their cultural resonance Conversely the arts are often deployed in the service of science communication illustration and popularization STS scholars have sought to resist the instrumentalization of the arts by the sciences emphasizing studies of theories and practices across disciplines and the distinctive and complementary contributions of each The manifestation of this commonality of creative and epistemic practices is the emergence of Art Science and Technology Studies ASTS as the interdisciplinary exploration of art science This handbook defines the modes practices crucial literature and research interests of this emerging field It explores the questions methodologies and theoretical implications of scholarship and practice that arise at the intersection of art and STS Further ASTS demonstrates how the arts are intervening in STS Drawing on methods and concepts derived from STS and allied fields including visual studies performance studies design studies science communication and aesthetics and the knowledge of practicing artists and curators ASTS is predicated on the capacity to see both art and science as constructions of human knowledge making Accordingly it posits a new analytical
