Handbook of Computational Social Science, Volume 2 Uwe Engel, Anabel Quan-Haase, Sunny Liu, Lars Lyberg, 2021-11-10

The Handbook of Computational Social Science is a comprehensive reference source for scholars across multiple disciplines. It outlines key debates in the field showcasing novel statistical modeling and machine learning methods and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches. The Handbook is divided into two volumes written by outstanding internationally renowned scholars in the field. This second volume focuses on foundations and advances in data science statistical modeling and machine learning. It covers a range of key issues including the management of big data in terms of record linkage streaming and missing data. Machine learning agent based and statistical modeling as well as data quality in relation to digital trace and textual data as well as probability non probability and crowdsourced samples represent further foci. The volume not only makes major contributions to the consolidation of this growing research field but also encourages growth into new directions. With its broad coverage of perspectives theoretical methodological computational international scope and interdisciplinary approach this important resource is integral reading for advanced undergraduates postgraduates and researchers engaging with computational methods across the social sciences as well as those within the scientific and engineering sectors.

Critical Thinking in Clinical Research Felipe Fregni, Ben M. W. Illigens, 2018. Critical Thinking in Clinical Research explains the fundamentals of clinical research in a case based approach. The core concept is to combine a clear and concise transfer of information and knowledge with an engagement of the reader to develop a mastery of learning and critical thinking skills. The book addresses the main concepts of clinical research basics of biostatistics advanced topics in applied biostatistics and practical aspects of clinical research with emphasis on clinical relevance across all medical specialties.

Research Anthology on Military and Defense Applications, Utilization, Education, and Ethics Management Association, Information Resources, 2021-05-28. Military technology is highly advanced in terms of technology being used in the field computer applications artificial intelligence and software applications. These high performance technologies range from weapons to communications technology to automation in vehicles and weaponry. These technologies must be both secure and reliable in harsh environments. Research is being focused specifically on that including how military and defense applications operate what modern technologies are being used and the ethics surrounding these applications. A holistic view of these applications is necessary for both understanding current military tactics and tools along with the future applications. The Research Anthology on Military and Defense Applications Utilization Education and Ethics focuses specifically on military and defense operations expenditure technologies and tools and the ethics surrounding technologies like weaponry and artificial intelligence in the military. The chapters cover a wide and diverse range of military and defense applications while providing crucial information on the functions security and reliability of these technologies. Beyond an understanding of the applications themselves this book also focuses on military education.

Bock, 2021-01-22 For courses in Introductory Statistics Encourages statistical thinking using technology innovative methods and a sense of humour Inspired by the 2016 GAISE Report revision Stats Data and Models 5th Edition by De Veaux Velleman and Bock uses innovative strategies to help students think critically about data while maintaining the book s core concepts coverage and most importantly readability The authors make it easier for instructors to teach and for students to understand more complicated statistical concepts later in the course such as the Central Limit Theorem In addition students get more exposure to large data sets and multivariate thinking which better prepares them to be critical consumers of statistics in the 21st century The 5th Edition s approach to teaching Stats Data and Models is revolutionary yet it retains the book s lively tone and hallmark pedagogical features such as its Think Show Tell Step by Step Examples The full text downloaded to your computer With eBooks you can search for key concepts words and phrases make highlights and notes as you study share your notes with friends eBooks are downloaded to your computer and accessible either offline through the Bookshelf available as a free download available online and also via the iPad and Android apps Upon purchase you ll gain instant access to this eBook Time limit The eBooks products do not have an expiry date You will continue to access your digital ebook products whilst you have your Bookshelf installed Samples Download the detailed table of contents Preview sample pages from Stats Data and Models Global Edition **Mathematics for Social Justice** Gizem Karaali, Lily S. Khadjavi, 2021-11-15

Mathematics for Social Justice Focusing on Quantitative Reasoning and Statistics offers a collection of resources for mathematics faculty interested in incorporating questions of social justice into their classrooms. The book comprises seventeen classroom tested modules featuring ready to use activities and investigations for college mathematics and statistics courses. The modules empower students to study issues of social justice and to see the power and limitations of mathematics in real world contexts of deep concern. The primary focus is on classroom activities where students can ask their own questions, find and analyze real data, apply mathematical ideas themselves, and draw their own conclusions. Module topics in the book focus on technical content that could support courses in quantitative reasoning or introductory statistics. Social themes include electoral issues, environmental justice, equity, inequity, human rights, and racial justice, including topics such as gentrification, partisan gerrymandering, policing, and more. The volume editors are leaders of the national movement to include social justice material in mathematics teaching and jointly edited the earlier AMS/MAA volume *Mathematics for Social Justice: Resources for the College Classroom*. Gizem Karaali is Professor of Mathematics at Pomona College. She is a past chair of the Special Interest Group of the MAA on Quantitative Literacy (SIGMAA QL). She is one of the founding editors of *The Journal of Humanistic Mathematics*, senior editor of *Numeracy*, and an associate editor for *The Mathematical Intelligencer*; she also serves on the editorial board of the MAA's Classroom Resource Materials series. Lily Khadjavi is Professor and Chair of Mathematics at Loyola Marymount University and is a past co-chair of the Infinite Possibilities Conference. In 2020, she was appointed by the California State Attorney General to the Racial and Identity Profiling Act Board, which works with the California Department of Justice. She currently serves on the editorial board of the MAA's Spectrum series and the Human Resources Advisory Committee for the Mathematical Sciences Research Institute in Berkeley. **5**
