

State-directed development Political power and industrialization in the global periphery

(Atul Kohli. Cambridge: Cambridge University Press, 2004)

Bruno Borges

Duke University, US

If life was hard for late-industrializers at the end of the nineteenth century, it became even more so for late-late-industrializers in the twentieth century. This seems to be the overall message that Kohli highlights in his impressive survey and comparison of industrialization in four large developing countries. There are many profound challenges involved in this process. First, it is impossible to promote economic development in a vacuum, since every country is somehow connected with the international system, especially countries that were formerly colonies of the main industrial core. Second, the stages of economic interconnectedness force these countries to promote several processes simultaneously: state and institutional building, economic growth, and, if possible, “catching up” with development in an international scale. Third, the shadows of previous institutions are legacies that may facilitate or hinder development projects. Finally, as Gerschenkron argued in the 1960s, as technological changes increase in the international system, the role of the state in promoting development (or at least inducing) becomes even more central (Gerschenkron 1962), generating, in certain cases, perverse incentives for bureaucrats to act without any accountability to the public at large.

Being aware of these limitations, Kohli focuses his research on four major developing countries: Brazil, South Korea, Nigeria, and India. It is not by accident that these particular countries are chosen to study – large developing countries have some distinct characteristics that distinguish them from smaller ones, being the main one the possibility of developing more or less autonomous economies and generating an industrialization process based on national borders. Small states, as Katzenstein (1985) argues, are more exposed to risk in the international system and more likely to suffer from the effects of systemic changes. However, having the potential for industrialization does not translate directly into having the capacity to promote it, or even the conditions to carry it through.

State Directed Development State Directed Development:

State-Directed Development Atul Kohli, 2004-08-30 Why have some developing country states been more successful at facilitating industrialization than others An answer to this question is developed by focusing both on patterns of state construction and intervention aimed at promoting industrialization Four countries are analyzed in detail South Korea Brazil India and Nigeria over the twentieth century The states in these countries varied from cohesive capitalist mainly in Korea through fragmented multiclass mainly in India to neo patrimonial mainly in Nigeria It is argued that cohesive capitalist states have been most effective at promoting industrialization and neo patrimonial states the least The performance of fragmented multiclass states falls somewhere in the middle After explaining in detail as to why this should be so the study traces the origins of these different state types historically emphasizing the role of different types of colonialisms in the process of state construction in the developing world

State - Directed Development Atul Kohli, 2005 Why have some developing country states been more successful at facilitating industrialization than others An answer to this question is developed by focusing both on patterns of state construction and intervention aimed at promoting industrialization Four countries are analyzed in detail South Korea Brazil India and Nigeria over the twentieth century The states in these countries varied from cohesive capitalist mainly in Korea through fragmented multiclass mainly in India to neo patrimonial mainly in Nigeria It is argued that cohesive capitalist states have been most effective at promoting industrialization and neo patrimonial states the least The performance of fragmented multiclass states falls somewhere in the middle After explaining in detail as to why this should be so the study traces the origins of these different state types historically emphasizing the role of different types of colonialisms in the process of state construction in the developing world

Beyond the Resource Curse Brenda Shaffer, Taleh Ziyadov, 2011-12-30 When countries discover that they possess large deposits of oil and natural gas the news is usually welcome Yet paradoxically if they rely on their wealth of natural resources they often set down a path of poor economic performance and governance challenges Only a few resource rich countries have managed to develop their economies fully and provide a better and sustainable standard of living for large segments of their populations This phenomenon known as the resource curse is a core challenge for energy exporting states Beyond the Resource Curse focuses on this relationship between natural wealth and economic security discussing the particular pitfalls and consistent perils facing oil and gas exporting states The contributors to this volume look beyond the standard fields of research related to the resource curse They also shed new light on the specific developmental problems of resource rich exporting states around the globe including Azerbaijan Bahrain Cambodia East Timor Iran Norway Russia Trinidad and Tobago the United Arab Emirates and Venezuela Policy makers and academics think of energy security solely in terms of the interests of energy importers Beyond the Resource Curse shows that the constant volatility in energy markets creates energy security challenges for exporters as well

The Colonial Origins of Korean Enterprise Dennis L. McNamara, 1990-04-27 This book provides a

detailed picture of indigenous capitalism during Japanese colonization of Korea The author gives a compelling account of key personalities in the Korean business elite and of the personal dilemmas of balancing nationalism against success under dependent colonial conditions The author concludes that dependent rather than comprador capitalism characterized leading Korean businesses through 1945

Dictating Development Jonathan T. Kriekhaus, 2010-06-15 Dictating Development presents a powerful and original analysis of how colonialism has profoundly impacted the varying economic growth of developing nations While previous studies have focused primarily on the domestic neoliberal policies of government and the political capacity of developing states Dictating Development argues that economic growth is equally influenced positively and negatively by colonial powers Jonathan Kriekhaus examines both historic colonial influences on human capital and state structures as well as contemporary ones war market access and foreign aid Based on an in depth study of the regionally diverse nations of Mozambique Korea and Brazil and a statistical analysis of growth in ninety one countries from 1960 to 2000 Kriekhaus effectively demonstrates that most seemingly domestic political variables are in fact the byproduct of relationships with colonial powers While not denying the role of neoliberalism as an important factor in development Dictating Development reveals the roots of these policies how colonialism influences the very nature of government and societal productivity

Obasanjo, Nigeria and the World John Iliffe, 2011 Olusegun Obasanjo has been the most important and controversial figure in Nigeria s first 50 years of independence and the most powerful African of his time John Iliffe examines Olusegun Obasanjo s complex personality and the extreme controversy he arouses among Nigerians and illustrates the immense demands made on a leader of a state like Nigeria

Politics of Democratic Breakdown Gangsheng Bao, 2022-05-30 Democratic breakdown as a political and historic event can impact the fate of millions if not hundreds of millions of people by changing the political complexion of a country This book attempts to systematically explain why democracies collapse The author s main theoretical argument is based on the examination of two factors One is political cleavages among voters These can cause serious political conflicts and may lead to fierce political confrontation and major upheaval at the society level The other revolves around the types of political and institutional arrangements under democratic regimes Centrifugal democratic regimes are likely to weaken government capacity or state capacity rendering governments incapable of effectively resolving political conflicts and when these two factors come together political conflicts are less likely to be controlled effectively These situations can evolve into serious political crises and eventually lead to the collapse of democratic regimes The empirical research of this book is based on a comparative historical analysis of Germany Nigeria Chile and India Examining democratic collapses from both theoretical and empirical perspectives this book will be of interest to those engaged in the study of democracy Political Science Comparative Politics and Political Theory

States' Gains, Labor's Losses Dorothy J. Solinger, 2018-07-05 In this explicitly comparative work Dorothy J Solinger examines the effects of global markets on the domestic politics of major states In the late 1970s leaders around the world faced a need

both to continue productive investment and to cut labor costs to compete internationally in a changed world market To accommodate forces seemingly beyond their control they often opted to reduce social protections and benefits that citizens had come to expect in the process recalibrating their established political economic coalitions For countries whose governance was built on a coalition between workers and the state the political conundrum was particularly intense States Gains Labor s Losses concentrates on three countries China France and Mexico where revolution inspired political compacts between labor and the state had to be renegotiated In all three cases choices to forge a deepened dependence on international capital markets required the ruling parties to fire large numbers of workers and cut social benefits while attempting not to provoke widespread social unrest or even full scale revolt among their supporters China France and Mexico also shared strong legacies of protectionism and state intervention in the economy so the decision of each to join a supranational economic organization France and the EU China and the GATT WTO Mexico and NAFTA in the hope of alleviating crises of capital shortage involved submission to a new set of liberal economic rules that further compromised their sociopolitical compacts Examining a fundamental question about the dynamics of globalization and worker protest through an innovative comparative perspective States Gains Labor s Losses emphasizes the growing tensions and new compromises between the working class and their political leaders in the face of intense international economic pressures

Post-Soviet Power Susanne A. Wengle, 2015-02-05 Examines the transformation of the Russian electricity system during post Soviet marketization arguing for a view of economic and political development as mutually constitutive *Maoism in India* Bidyut Chakrabarty, Rajat Kumar Kujur, 2009-12-04 Through historical analysis this book assesses the ideological articulation of the contemporary ultra left movement in India including Maoism which is expanding gradually in India The author argues that Maoism provides critical inputs for an alternative paradigm for development relevant for transitional societies
