Statistics In Action Understanding A World Of Data:

Statistics in Action Ann E. Watkins, Richard L. Scheaffer, George W. Cobb, 2004-03-09 Statistics in Action promotes a modern data analytic approach to learning statistics that allows students to uncover display and explore patterns in data. Most data sets are real based on up to date research historical case studies and student collected data. Students use tools systematically to build a coherent description of data set patterns and to describe patterns in the language of their applied contexts. The text relies heavily on technology and it shifts from memorizing formulas to learning concepts first through activities then through an informal graphical approach and then via a more formal definition. This method motivates students and increases their knowledge.

Statistics in Action Ann E. Watkins, 2008-09-02 Statistics in Action teaches a modern approach to statistics that uses graphing calculators or statistical software and allows readers to place more emphasis on statistical concepts and data analysis than on following recipes for calculations. The text is intended to be used as much as a dialog as a reference readers will have to be thoughtful as they parse the text. An activity introduces each major topic allowing readers to experience the major concepts of statistical thinking before going on to confirm them through further analysis often involving simulation and practice with data. Statistics in Action gives the design and analysis of both experiments and surveys an honest treatment rather than forcing them into overly simplistic models.
