Investing Simplified Primer:

Income Investing Explained: Your Questions Answered Henry Mah, 1900 After writing two books about Income Investing I have been contacted regularly by readers with questions and requests for more information It s not often one feels compelled to write a book because of questions from readers but that s exactly how this book came about It s not that readers didn t understand the process I described it s just that people wanted more details had specific suggestions and needed more information about making investing decisions especially during different and difficult market conditions In essence people wanted an advanced outline to build upon the process described in my earlier books So the purpose of this book is not to repeat the process of stock evaluation which is the foundation of my earlier books but to provide further explanations and examples to help when making investing decisions Where to find ideal stocks for Income investing How to determine under valued stocks How many stocks should you hold and in which sectors When to sell even your long time good stocks What happens and how your decisions might change during a market crisis Is it ever too late to start investing for income I ll also introduce a new Excel worksheet to help readers determine under valued or expensive stocks directing you to a new website for obtaining dividend data and even provide a list of 45 Canadian and 35 US stocks from which to begin your selection of quality income growth stocks As always these are my opinions and not professional financial advice So if you have the time and want to learn more let s continue talking about Income Investing *Pump Priming And it's Impact on Inflation And Currency - A Study of China, India And The USA* Dr. V.V.L.N. Sastry, 2020-04-11 China uses pump priming to stimulate its economy however sterilization which involves the control of money in circulation to tackle inflation enables China to ensure that pump priming does not have a negative influence on the long term performance of the economy Further since China is an export based economy the country is able to implement monetary and fiscal policies that reduce the expansionary pressures of pump priming on the economy China is facing a backlash from various countries especially the U S forcing it to stabilize the value of the Renminbi In India the expenditures are disbursed through ministries of the central government to the state governments to facilitate the achievement of a certain objective Therefore it is pertinent to claim that the plans detail the pump priming initiatives that India would use during a specific period However the impact of the same on currency and inflation in India is just a one time event and not a continuous one like in some other countries India s fiscal budgeting system poses a threat to the economy The budget of the central government creates a debt trap It is inflexible due to politically irreducible commitments made by the government on provision of subsidies and various freebies Further the state governments depend on the cash transfers and grants provided by the central government and add to this their own share of subsidies and freebies This results in a limited focus on revenue generating assets In the USA President Roosevelt advocated the use of pump priming to tackle the depression This involved providing direct financial relief to the poor to enable them to make their purchases and this to a large extent brought the Great Depression to an end Further as a

second measure a raft of measures policies and programs were put in place which brought considerable economic relief to common households Prior to Roosevelt President Hoover to tackle the Great Depression ensured the creation of the Reconstruction Finance Corporation RFC which provided financial support to state and local governments and also provided loans to railroad projects banks and other businesses to prevent them from going bankrupt Among all recessions the 2008 financial crisis is regarded as the worst since the Great Depression The onset of financial crisis caused President George W Bush s administration to pass a 152 billion stimulus package in the form of tax rebates in 2008 It was amidst this financial crisis that President Obama took over and his administration allocated 787 billion to tackle the fallout from the financial crisis The conventional stimulus package that targeted the real economy was slightly more than 1 trillion The unconventional measures that provided direct assistance to the financial sector via TARP I and TARP II allocated three times the fiscal stimulus that targeted the real economy that is 3 trillion At the end of the financial crisis most parties acknowledged that pump priming did play a major role in improving public confidence and that the impact of the fiscal policy on the economy is dependent on the country or situation
