

"I know of no other book that has argued with such brilliance and historical breadth against the automatic pessimism that prevails in intellectual life. Where history, philosophy, economics, and biology meet, Matt Ridley has made his own rich territory, and he is its own enthralling guide. How wealth—mental as well as material—evolves and spreads is a fundamental question for our times, and *The Rational Optimist* teems with challenging and original ideas."

call for today's divided time a bold reaffirmation of the liberal democratic principles that have carried America through each crisis in its history and can do so again Merging expert historical political and economic analysis In *Defense of Liberal Democracy* shows how our recent technological revolution what high profile economist Manuel Hinds calls the Connectivity Revolution has led to a crisis of divisiveness Assessing the angry rhetoric and polarization of current political and social discourse in the US Hinds considers the dangers of seeking populist solutions to our current upheaval and shows how the traditions and institutions of liberal democracy restored prosperity freedom and social equity during the Industrial Revolution the Great Depression and other periods of political instability Hinds examines our national past and present up to and including the 2020 presidential election to illustrate how current events can be as dramatic as any historical legacy in warning us of the danger of abandoning our democratic principles

Teaching Crowds John Dron, Terry Anderson, 2014-09-01 Within the rapidly expanding field of educational technology learners and educators must confront a seemingly overwhelming selection of tools designed to deliver and facilitate both online and blended learning Many of these tools assume that learning is configured and delivered in closed contexts through learning management systems LMS However while traditional classroom learning is by no means obsolete networked learning is in the ascendant A foundational method in online and blended education as well as the most common means of informal and self directed learning networked learning is rapidly becoming the dominant mode of teaching as well as learning In *Teaching Crowds* Dron and Anderson introduce a new model for understanding and exploiting the pedagogical potential of Web based technologies one that rests on connections on networks and collectives rather than on separations Recognizing that online learning both demands and affords new models of teaching and learning the authors show how learners can engage with social media platforms to create an unbounded field of emergent connections These connections empower learners allowing them to draw from one another's expertise to formulate and fulfill their own educational goals In an increasingly networked world developing such skills will they argue better prepare students to become self directed lifelong learners
