The Routledge Handbook of Mobilities Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10

The 21st century seems to be on the move perhaps even more so than the last. With cheap travel and more than two billion cars projected worldwide for 2030, and yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally, socially and ethically. As a result, mobility has become a keyword of the social sciences, delineating a new domain of concepts, approaches, methodologies and techniques which seek to understand the character and quality of these trends. This Handbook explores and critically evaluates the debates, approaches, controversies and methodologies inherent to this rapidly expanding discipline. It brings together leading specialists from a range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field, conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities. It illustrates disciplinary trends and pathways from migration studies and transport history to communications research, featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies. It explores the dominant figures of mobility from children to soldiers and the mobility impaired, the disparate materialities of mobility such as flows of water and waste to the vectors of viruses, key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems. The text is forward thinking, projecting the future of mobilities as they might be lived, transformed and studied, and possibly brought to an end. International in focus, the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives, different fields, countries and standpoints. This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study.

Handbook of Research Methods and Applications for Mobilities

Monika Büscher, Malene Freudendal-Pedersen, Sven Kesselring, Nikolaj Graustlund Kristensen, 2020-08-28 Reflecting the variety and diversity of mobile methods and their applications this comprehensive Handbook illuminates the multiple dimensions and transdisciplinary nature of mobilities research from transport to tourism cargo to information as well as physical virtual and imaginative mobilities It brings together key contributions on the state of the art of qualitative and quantitative research multimethod combinations and co creation methods within the mobilities paradigm

Law, Migration, and Human Mobility Magdalena Kmak, 2023-09-14 This book analyses the multifaceted ways law operates in the context of human mobility as well as the ways in which human mobility affects law Migration law is conventionally understood as a tool to regulate human movement across borders and to define the rights and limits related to this movement But drawing upon the emergence and

development of the discipline of mobility studies this book pushes the idea of migration law towards a more general concept of mobility that encompass the various processes effects and consequences of movement in a globalized world In this respect the book pursues a shift in perspective on how law is understood Drawing on the concepts of kinology and kinopolitics developed by Thomas Nail as well as mobility justice developed by Mimi Sheller the book considers movement and motion as a constructive force behind political and social systems and hence stability that needs to be explained and justified Tracing the processes through which static forms such as state citizenship or border are constructed and how they partake in production of differential mobility the book challenges the conventional understanding of migration law More specifically and in revealing its contingent and unstable nature the book reveals how human mobility is itself constitutive of law This interdisciplinary book will appeal to those working in the areas of migration and refugee law citizenship studies mobility studies legal theory and sociolegal studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Funded by University of Helsinki and bo Akademi University

Reimagining Mobilities across the Humanities Lucio Biasiori, Federico Mazzini, Chiara Rabbiosi, 2023-01-31 Volume 2 Objects People and Texts explores the movement of individuals and peoples and the circulation of material objects and books and texts Through a series of short chapters mobility is employed as an elastic inclusive and multifaceted concept across various disciplines to shed light on a geographically and chronologically broad range of issues and case studies In doing so the concept of mobility is positioned as a powerful catalyst for historical change and as a fruitful approach to research in the humanities and social sciences Like its sister volume this volume is edited and written by members of the Centre for Advanced Studies in Mobility and the Humanities MoHu at the Department of Historical and Geographical Sciences and The Ancient World DiSSGeA of the University of Padua Italy The structure of the book mirrors the Theories and Methods and Ideas thematic research clusters of the Centre Afterwords from leading scholars from other institutions synthesise and reflect upon the findings of each section This volume together with Volume 1 Theories Methods and Ideas makes a compelling case for the use of mobility studies as a research framework in the humanities and social sciences As such it will be of interest to students and researchers in various disciplines

Mobilities and Human Possibility Vlad Petre Glăveanu, 2020-08-26 This book brings together mobilities and possibility studies by arguing that the possible emerges in our experience in and through acts of movement physical social and symbolic The basic premise that mobility begets possibility is supported with evidence covering a wide range of geographic and temporal scales First in relation to the evolution of our species and the considerable impact of mobility on the emergence and spread of prehistoric innovations second considering the circulation of people things and creative ideas throughout history third in view of migrations that define an individual life course and its numerous possibilities and fourth in the inner psychological movements specific for our wandering and wondering minds This is not however a romantic

account of how more mobility is always better or leads to increased creativity and innovation After all movement can fail in opening up new possibilities and innovations can cause harm or reduce our agency And yet at an ontological level the fact remains that it is only by moving from one position to another that we develop novel perspectives on the world and find alternative ways of acting and being At this foundational level mobilities engender possibilities and the latter in turn fuel new mobilities This interplay examined throughout the book should be of interest for researchers and practitioners working on mobility migration creativity innovation cultural diffusion life course approaches and more generally on the possibilities embedded in mobile lives Handbook on the Geographies of Globalization Robert C. Kloosterman, Virginie

Mamadouh, Pieter Terhorst, 2018-11-30 Processes of globalization have changed the world in many often fundamental ways Increasingly these processes are being debated and contested This Handbook offers a timely rich as well as critical panorama of these multifaceted processes with up to date chapters by renowned specialists from many countries It comprises chapters on the historical background of globalization different geographical perspectives including world systems analysis and geopolitics the geographies of flows of people goods and services and capital and the geographies of places including global cities clusters port cities and the impact of climate change **Handbook of Language and Mobility** Alfonso Del

Percio, 2025-07-21 The Handbook of Language and Mobility challenges the assumption that mobility is a new norm It maps new developments in language and mobility scholarship tracing how the mobility of language people and knowledge intersects with multiplicity infrastructures historicity new political formations and processes of world making By decentering mobility this handbook questions which processes come to be recognized as mobile and how mobility is historically shaped regulated valued and stigmatized By recentring mobility it explores its productive dimensions how it sustains and aligns with celebratory ideologies of globalization technology and agency creates value and contributes to the management and legitimation of difference and inequality Mobility here is not just about movement it shapes time space subjectivities power and systems of accumulation **Mobilities, Literature, Culture** Marian Aguiar, Charlotte Mathieson, Lynne

Pearce, 2019-09-25 This is the first book dedicated to literary and cultural scholars engagement with mobilities scholarship As such the volume both advances new theoretical approaches to the study of culture and furthers the recent humanities turn in mobilities studies The book's scholarship is deeply informed by cultural geography's vision of a mobilised reconceptualisation of space and place but also by the contribution of literary scholars in articulating questions of travel technologies of transport post colonialism and migration through a close engagement with textual materials A comprehensive introduction maps pre histories and emerging directions of this exciting interdisciplinary endeavor while taking up the theoretical and methodological challenges of the burgeoning subfield Contributions range across geographical and disciplinary boundaries to address questions of embodied subjectivities mobility and the nation geopolitics of migration and mobilities futures
