Steve Tombs

The Regulatory Craft Controlling Risks Solving Problems And Managing Compliance:

The Regulatory Craft Malcolm K. Sparrow, 2000-05 This text tackles one of the most pressing public policy issues of our time the reform of regulatory and enforcement practice

The Character of Harms Malcolm K. Sparrow, 2008-04-17 How should we deal with societal ills such as crime poverty pollution terrorism and corruption The Character of Harms argues that control or mitigation of bad things involves distinctive patterns of thought and action which turn out to be broadly applicable across a range of human endeavors and which need to be better understood Malcolm Sparrow demonstrates that an explicit focus on the bads rather than on the countervailing goods safety prosperity environmental stewardship etc can provide rich opportunities for surgically efficient and effective interventions an operational approach which he terms the sabotage of harms The book explores the institutional arrangements and decision frameworks necessary to support this emerging operational model Written for reflective practitioners charged with risk control responsibilities across the public private and non governmental sectors The Character of Harms makes a powerful case for a new approach to tackling the complex problems facing society

Impact Assessment in EU Lawmaking Anne C. M. Meuwese, 2008-01-01 Recent constitutional thinking has directed its attention to the profound impact of soft norms on the way legislation is made This book identifies the European Union's impact assessment regime as a source of these norms In 2002 the European Commission later followed by the European Parliament and the Council of Ministers committed to performing rigorous assessment of the economic social and environmental impacts of policy options before adopting legislative proposals Applying a constitutional lens to this regulatory topic Anne Meuwese examines both the details and the framework of IA in EU lawmaking to date drawing attention to its strengths its contradictions and its power to enhance the deliberative quality of legislative debates Integrating the perspectives of political scientists and economists with the concerns of legal scholars and practitioners Dr Meuwese describes and interrelates such aspects of the subject as the following the potential role of impact assessment as a catalyst of legal principles by emphasising or overriding norms that govern both the procedural and the substantive aspects of the EU legislative process the constitutional tasks of impact assessment as applied to European legislative proposals especially relating to subsidiarity proportionality and the precautionary principle the formal and informal extension of the scope of impact assessment beyond the co decision procedure the question whether impact assessment crosses the line between informing the legislator and fettering legislative discretion In the course of her analysis Dr Meuwese develops models for possible usages of IA in EU lawmaking analyses the implementation of impact assessment processes in the European Commission the European Parliament and the Council as well as the roles of relevant co actors and offers results of empirical research in the forms of a survey of EU legislative practice and in depth case studies of four EU legislative dossiers

Research Handbook on the Economics of Labor and Employment Law Michael L. Wachter, Cynthia L. Estlund, 2012-01-01 Wachter and Estlund have assembled a feast on the economic analysis of issues in

labor and employment law for scholars and policy makers The volume begins with foundational discussions of the economic analysis of the individual employment relationship and collective bargaining It then progresses to discussions of the theoretical and empirical work on a wide range of important labor and employment law topics including union organizing and employee choice the impact of unions on firm and economic performance the impact of unions on the enforcement of legal rights just cause for dismissal covenants not to compete and employment discrimination Anyone who wants to study what economists have to say on these topics would do well to begin with this collection Kenneth G Dau Schmidt Indiana University Bloomington School of Law US This Research Handbook assembles the original work of leading legal and economic scholars working in a variety of traditions and methodologies on the economic analysis of labor and employment law In addition to surveying the current state of the art on the economics of labor markets and employment relations the volume s 16 chapters assess aspects of traditional labor law and union organizing the law governing the employment contract and termination of employment employment discrimination and other employer mandates restrictions on employee mobility and the forum and remedies for labor and employment claims Comprising a variety of approaches the Research Handbook on the Economics of Labor and Employment Law will appeal to legal scholars in labor and employment law industrial relations scholars and labor economists

Regulation and Regulators after Global Financial Crises Aleksandra Jordanoska, 2024-12-31 This book provides an original theoretically and empirically grounded analysis of regulatory enforcement activism in post crisis periods and the ensuing regulatory interactions It critically addresses the more regulation enforcement agenda relating to financial misconduct in the aftermath of the 2008 financial crisis showing how misconduct was constructed through the enforcement policies and practices of the powerful UK financial conduct regulator and its interactions with the subjects of enforcement proceedings and their legal representatives during a tumultuous time in the financial markets Drawing from interviews with regulators professional intermediaries and markets participants documentary analysis of enforcement decisions and speeches and observations the volume adopts an interdisciplinary approach grounded in social constructivist perspectives on compliance and deviance regulation theory and socio legal research Through a multi dimensional analytical framework of regulatory enforcement activism that links shifts in regulatory policymaking experimentations with legal powers in information gathering legal and extra legal penalties and individual accountability and the use of enforcement tools in micro level interactions the book documents a more interventionist and punitive post crisis enforcement agenda The findings challenge current thinking in the scandal and reform literature The work argues that despite the increased focus on enforcement it is not necessarily the case that the power has tilted more towards the regulator This fine grained socio legal enquiry makes innovative and timely theoretical contributions to our understanding of the limitations of regulatory activism and regulatory control regulatory relationships the governance of financial markets and broader thinking on regulating corporations and the individuals within them It will appeal to academics researchers regulators and policymakers working in

regulation across law criminology sociology and politics **Social Protection After the Crisis** Steve Tombs,2017-03-15 This topical book considers the economic political and social consequences of the economic crisis the nature of social protection and the dynamics of the current crisis of regulation It is unique in documenting how economic and social welfare are inconsistent with corporate freedom **Corporate Regulation for Climate Change Mitigation in Africa** Kikelomo O. Kila,2022-09-08 This book critically analyses the prospects of overhauling the legal framework of climate change regulation of corporations in African state It adopts the dilute interventionism regulatory framework to tackle the culture of regulatory resistance by corporations in Africa Over the course of this volume Kikelomo O Kila critiques the climate change legal framework in all 53 African states and conducts an in depth case study of the two largest economies in Africa Nigeria and South Africa to highlight the commonality of the problems in Africa and the potential for the dilute interventionism paradigm to significantly address these problems The book establishes why African states should directly intervene through legislative mechanisms to compel corporations to incorporate climate change mitigation in their business activities It proposes that this direct intervention should comprise a blend of prescriptive and facilitative mechanisms structured in a dilute interventionism regulatory model Overall this volume argues that implementing this model requires the institution of a strong and independent regulator with a veto firewall protection system that guarantees its de facto independence from government and external influences Corporate Regulation for Climate Change Mitigation in Africa will be of great interest to climate change stakeholders at the international regional and domestic levels policymakers regulatory practitioners and legal experts on corporate regulation It will also be an insightful resource for students and scholars of climate change and environmental law policy and governance **Architectural Design and Regulation** Rob Imrie,Emma Street,2011-01-21 From the earliest periods of architecture and building architects actions have been conditioned by rules regulations standards and governance practices These range from socio cultural and religious codes seeking to influence the formal structure of settlement patterns to prescriptive building regulations specifying detailed elements of design in relation to the safety of building structures In Architectural Design and Regulation the authors argue that the rule and regulatory basis of architecture is part of a broader field of socio institutional and political interventions in the design and development process that serve to delimit and define the scope of the activities of architects The book explores how the practices of architects are embedded in complex systems of rules and regulations The authors develop the understanding that the rules and regulations of building form and performance ought not to be counterpoised as external to creative processes and practices but as integral to the creation of well designed places The contribution of Architectural Design and Regulation is to show that far from the rule and regulatory basis of architecture undermining the capacities of architects to design they are the basis for new and challenging activities that open up possibilities for reinventing the actions of architects **Inspectors and Enforcement at the Front Line of Government** Steven Van de Walle,Nadine Raaphorst,2018-12-29 This book explores the social dynamics of the interaction

between inspectors and their inspectees in the public sector Government inspectors have a crucial role in enforcing rules and standards The role of inspectors has changed Their task is no longer to merely inspect and enforce but also to educate to negotiate and to make compromises Their decisions come about as a result of an interaction with inspectees Do I punish or do I let go Do I negotiate or do I issue a fine Do I believe what this inspectee is telling me Using insights from public administration regulation and sociology this book looks at the daily work of a diverse group of inspectors such as tax inspectors veterinary inspectors school inspectors environmental inspectors or health inspectors **Institutions,**

Regulatory Styles, Society and Environmental Governance in China Carlos Wing-Hung Lo, Shui-Yan Tang, 2013-08-15 During the past three decades of rapid industrial growth China has suffered from devastating environmental degradation Most scholarly and popular publications have painted a rather pessimistic picture about the worrisome trend Yet a somewhat more optimistic view has emerged in the past decade given the Chinese government's increased commitment to fighting industrial pollution the public's increased concerns regarding the adverse effects of pollution and domestic and international civil society's increased involvement in promoting environmental protection in China Drawing on the authors extensive research on Guangdong Province and a few large cities in other provinces this book provides an in depth study on China's environmental governance and regulatory enforcement in the past two decades Section 1 examines various institutional constraints for environmental regulation enforcement at the local level and how governance reform efforts in the past decade have contributed to the lessening of those constraints Section 2 draws on data derived from surveys and interviews conducted in multiple cities and times it examines the dominant regulatory enforcement styles of local environmental protection bureaus and how these styles vary across different regions and over time Section 3 examines how various stakeholders the general public environmental groups government entities and corporations affect the environmental governance process Overall the book presents a cautiously optimistic view on the evolution of environmental governance in China While highlighting many political institutional social and economic constraints it also documents many changes that have taken place including reform efforts from within the government administrative system increasingly societal concerns and actions and changing attitudes among corporate executives potentially paving the way for more effective environmental governance in the future
