feminism and social constructionism for insights into Carr's life in the late Victorian period and early twentieth century. Presented in two parts, the book introduces Carr's migratory English family and childhood on the edge of nowhere and her art education in San Francisco, London, and Paris. Travels in the wilderness introduced her to the totem art of the Pacific Northwest coast at a time Aboriginal art was undervalued and believed to be disappearing. Carr vowed to document it before turning to spirited landscapes of forest, sea, and sky. The second part of the book presents a Jungian portrait of Carr, including typology, psychological complexes, and archetypal features of personality. An examination of the individuation process and Carr's embrace of transcendental philosophy reveals the richness of her personality and artistic genius. *Artist Emily Carr and the Spirit of the Land* provides captivating reading for analytical psychologists, academics, and students of Jungian studies, art history, health, gender, and women's studies. **Comic songs. How did the rise of metropolitan art institutions influence modernism and the modernisation of art in England? This volume explores the artist as creator, notions of class and taste, and the power of institutions to affect creativity and artistic expression. Topics discussed include the radicalism of engravers and how their claim to be artists is an important and neglected aspect of the nineteenth-century art world, and how the aesthetic dispute over the Chantrey Bequest epitomized conflicts of taste, cultural independence, and interdependence between opposed art institutions and the Treasury. **A History of American Architecture** Mark Gelernter, 2001.
