Confidential Documents United States. Army Air Forces, 1940 **The Littorio Class** Ermingo Bagnasco, Augusto de Toro, 2011-07-18 An important work for anyone interested in warship design the naval side of World War II in the Mediterranean or modern Italian history New York Military Affairs Symposium For its final battleship design Italy ignored all treaty restrictions on tonnage and produced one of Europe s largest and most powerful capital ships comparable with Germany s Bismarck class similarly built in defiance of international agreements The three ships of the Littorio class were typical of Italian design being fast and elegant but also boasting a revolutionary protective scheme which was tested to the limits as all three were to be heavily damaged in the hard fought naval war in the Mediterranean Roma had the unfortunate distinction of being the first capital ship sunk by guided missile These important ships have never been covered in depth in English language publications but the need is now satisfied in this comprehensive and convincing study by two of Italy s

leading naval historians The book combines a detailed analysis of the design with an operational history evaluating how the ships stood up to combat It is illustrated with an amazing collection of photographs many fine line plans and colored artwork of camouflage schemes adding up to as complete a monograph on a single class ever published Among warship enthusiasts battleships enjoy a unique status As the great success of Seaforth's recent book on French battleships proves that interest transcends national boundaries and this superbly executed study is certain to become another classic in the field A very impressive piece of work History of War An essential book for all naval history enthusiasts Firetrench **Special**

Sadkovich,2025-03-27 Rather than a chronological account this history contains discussions of topics ranging from economics and diplomacy to industrial capacity and armored doctrine The author challenges claims that Italians were militarily incompetent by examining the influence of demography natural resources industrial capacity and Italy s allies on its war efforts during both world wars He also challenges assertions that ideology determined the choice of allies and formulation of military doctrine and arguments that Italy s war effort was negligible in world wars Based on primary and secondary sources this revisionist history contains seventy four tables and arguments rarely found in the literature in English

Catapult Aircraft Leo Marriott,2020-01-24 A concise history of this specialty aircraft used during World Wars I and II During World War I the navies of the opposing forces discovered the value of aerial reconnaissance and many experiments were made to allow larger warships to carry one or sometimes two aircraft aboard In the early days these were float planes that were lowered by crane into the sea and then lifted back aboard upon their return This was a lengthy affair and when a speedy departure was necessary time was of the essence A new system was devised so that a powerful catapult system and a short ramp could with the added speed of the ship get an aircraft airborne in a fraction of the time previously required Thus was born a highly specialised type of aircraft This book includes all the major designs that went to war in the First and Second World Wars and includes aircraft used by all the combatants It looks at how the aircraft evolved and how the warships were modified to accommodate the aircraft and the catapult system The use of these fixed wing aircraft was abandoned when the invention of the helicopter was made in the early post WWII years **Italian Aircraft of World War**
