The Reviewers Guide To Quantitative Methods In The Social Sciences:

The Reviewer's Guide to Quantitative Methods in the Social Sciences Gregory R. Hancock, Laura M. Stapleton, Ralph O. Mueller, 2018-11-15 The Reviewer's Guide to Quantitative Methods in the Social Sciences provides evaluators of research manuscripts and proposals in the social and behavioral sciences with the resources they need to read, understand, and assess quantitative work. 35 uniquely structured chapters cover both traditional and emerging methods of quantitative data analysis which neither junior nor veteran reviewers can be expected to know in detail. The second edition of this valuable resource updates readers on each technique's key principles, appropriate usage, underlying assumptions, and limitations, providing reviewers with the information they need to offer constructive commentary on works they evaluate. Written by methodological and applied scholars, this volume is also an indispensable author's reference for preparing sound research manuscripts and proposals.

The Reviewer's Guide to Quantitative Methods in the Social Sciences Gregory R. Hancock, Ralph O. Mueller, Laura M. Stapleton, 2010-04-26 Designed for reviewers of research manuscripts and proposals in the social and behavioral sciences and beyond, this title includes chapters that address traditional and emerging quantitative methods of data analysis.

New Scholarship in Critical Quantitative Research, Part 2: New Populations, Approaches, and Challenges Ryan S. Wells, Frances K. Stage, 2015-05-04 This volume is the second in a two-part series on differentiating approaches to quantitative research from more traditional positivistic and postpositivistic approaches. While the first volume provided an expanded conceptualization of critical quantitative inquiry, this volume concludes the series by applying critical quantitative approaches to new populations of college students who are rarely addressed in institutional and higher education research, such as American Indian/Alaska Native and students with disabilities, applying the principles of quantitative criticalism to advanced methods of statistical analysis and discussing the variety of challenges to overcome and presenting a future research agenda using these methods. This work is of interest to institutional and higher education researchers who want to expand and critique new ways of thinking about the broad array of populations participating in and served by higher education while keeping in mind the goals of revealing inequity, challenging marginalization, and helping all students to succeed. This is the 163rd volume of this Jossey-Bass quarterly report series. Timely and comprehensive, New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management.

Partial Least Squares Path Modeling Hengky Latan, Joseph F. Hair, Jr., Richard Noonan, 2023-11-14 Now in its second edition, this edited book presents recent progress and techniques in partial least squares path modeling (PLS-PM) and provides a comprehensive overview of the current state of the art in PLS-PM research. Like the previous edition, the book is divided into three parts: the first part emphasizes the basic concepts and extensions of the PLS-PM method; the second part discusses the methodological issues that have been the focus of recent developments; and the last part deals with real-world

applications of the PLS PM method in various disciplines This new edition broadens the scope of the first edition and consists of entirely new original contributions again written by expert authors in the field on a wide range of topics including how to perform quantile composite path modeling with R the rationale and justification for using PLS PM in top tier journals psychometric properties of three weighting schemes and why PLS PM is a better fit to mode B a comprehensive review of PLS software how to perform out of sample predictions with ordinal consistent partial least squares multicollinearity issues in PLS PM using ridge regression theorizing and testing specific indirect effects in PLS and considering their effect size how to run hierarchical models and available approaches and how to apply necessary condition analysis NCA in PLS PM This book will appeal to researchers interested in the latest advances in PLS PM as well as masters and Ph D students in a variety of disciplines who use PLS PM methods With clear guidelines on selecting and using PLS PM especially those related to composite models readers will be brought up to date on recent debates in the field

Student's Guide to Writing Dissertations and Theses in Tourism Studies and Related Disciplines Tim Coles, David Timothy Duval, Gareth Shaw, 2013-05-02
Around the world every year very many students have to complete dissertations or theses as part of their undergraduate or masters studies in tourism and related subjects. Often this substantial piece of self-directed work is the culmination of their programmes. More than just a means to consolidate their final grades, it is also an exciting chance to research a topic of their choosing and a potential gateway to more advanced study as well as job offers and future career paths. Yet for all these reasons many students view the dissertation as a tricky challenge. This comprehensive book intends to take the stress and anxiety out of doing a dissertation in tourism studies and related disciplines. The process is examined from the germination of an idea to the submission and assessment of the final document. Written primarily for students conducting independent research for the first time, this book offers simple advice and a clear framework which students can adopt even in more advanced studies at masters and doctoral level. This book debunks popular myths and aims to overcome common pitfalls. It focuses on the aims and objectives as the DNA of every dissertation. Rather than view it as a single overwhelming project, the dissertation is presented as a series of more modest, manageable yet crucially inter-linked tasks that all students can successfully complete through careful preparation and effective time management. Dissertations are not to be underestimated and they demand great care and attention, but they can also be immensely rewarding and enriching experiences, academically and personally. This jargon-free book is also written with overseas students specifically in mind, drawing directly on our overseas students' experiences. This valuable resource contains start of chapter learning objectives and end of chapter checklists, as well as numerous boxed case studies to further help assist students through their dissertation.

Research Methods in Building Science and Technology Rahman Azari, Hazem Rashed-Ali, 2021-09-09
This book covers the range of methodological approaches, methods, and tools currently used in various areas of building science and technology research and addresses the current lack of research method literature in this field. The book covers the use of measurement-based methods in which data is collected by measuring the properties and their variations in actual physical systems; simulation-based methods which work with models of systems or processes to describe, examine, and analyze their behaviors, performances, and operations; and data-driven methodologies in which data is collected via measurement or simulation to identify and examine the associations and patterns and predict the future in a targeted system. The book presents a survey of key methodologies in various specialized areas of building science and technology research, including window systems, building enclosure energy performance, lighting and daylighting, computational fluid dynamics, indoor and outdoor thermal comfort, and life cycle environmental impacts. Provides advanced insight into the research methods and presents the key methodologies within the field of building science.
