Strategies That Work Stephanie Harvey, Anne Goudvis, 2023-10-10 Since the first publication of *Strategies That Work* numerous new books on reading comprehension have been published and more educators than ever are teaching comprehension. In this third edition of their groundbreaking book, authors Stephanie Harvey and Anne Goudvis bring you *Strategies That Work: Teaching Comprehension for Understanding, Engagement, and Building Knowledge*. This new edition is organized around three sections: Part I, Starting with the Foundation of Meaning; these chapters provide readers with a solid introduction to reading comprehension instruction, including principles that guide practice suggestions for text selection and a review of recent research; Part II, Putting these principles into practice for all areas of reading comprehension; Part III, This section shows you how to integrate comprehension instruction across the curriculum and the school day with a focus on science and social studies. In addition, this new version includes updated bibliographies, including the popular *Great Books for Teaching*, content online resources, and fully revised chapters focusing on digital reading strategies for integrating comprehension and technology and comprehension across the curriculum. Harvey and Goudvis tackle close reading, close listening, text complexity, and critical thinking and demonstrate how your students can build knowledge through thinking-intensive reading and learning. This third edition is a must-have resource for a generation of new teachers and a welcome refresher for those with dog-eared copies of this timeless guide to reading comprehension.

Educating Our Children to Succeed in the Global Economy United States. Congress. Senate. Committee on Health, Education, Labor, and Pensions, 2014

Early Engineering Learning Lyn English, Tamara Moore, 2018-05-29 This book addresses engineering learning in early childhood, spanning ages 3 to 8 years. It explores why engineering experiences are important in young children's overall development and how engineering is a core component of early STEM learning, including how engineering education links and supports children's existing experiences in science, mathematics, and design and technology both before school and in the early school years. Promoting STEM education across the school years is a key goal of many nations, with the realization that building STEM skills required by societies takes time and needs to begin as early as possible. Despite calls from national and international organizations, the inclusion of engineering-based learning within elementary and primary school programs remains limited in many countries. Engineering experiences for young children in the pre-school or early school years has received almost no attention, even though young children can be considered natural engineers. This book addresses this void by exposing what we know about engineering for young learners, including their capabilities for solving engineering-based problems and the few existing programs that are capitalising on their potential.
