Bauldry, 2011-09-09 An accessible introduction to real analysis and its connection to elementary calculus Bridging the gap between the development and history of realanalysis Introduction to Real Analysis An Educational Approach presents a comprehensive introduction to real analysiswhile also offering a survey of the field With its balance ofhistorical background key calculus

methods and hands onapplications this book provides readers with a solid foundationand fundamental understanding of real analysis. The book begins with an outline of basic calculus including aclose examination of problems illustrating links and potential potential potential difficulties. Next a fluid introduction to real analysis is presented guiding readers through the basic topology of real numbers limits integration and a series of functions in natural progression. The book moves on to analysis with more rigorous investigations and the topology of the line is presented along with a discussion of limits and continuity that includes unusual examples in order to direct readers thinking beyond intuitive reasoning and on to more complex understanding. The dichotomy of pointwise and uniform convergence is then addressed and is followed by differentiation and integration Riemann Stieltjes integrals and the Lebesgue measure are also introduced to broaden the presented perspective. The book concludes with a collection of advanced topics that are connected to elementary calculus such as modeling with logistic functions numerical quadrature. Fourier series and special functions. Detailed appendices outline key definitions and theorems in elementary calculus and also present additional proofs projects and sets in real analysis. Each chapter references historical sources on real analysis while also providing proof oriented exercises and examples that facilitate the development of computational skills. In addition an extensive bibliography provides additional resources on the topic Introduction to Real Analysis. An Educational Approach is an ideal book for upper undergraduate and graduate level real analysis courses in the areas of mathematics and education.
