The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

Complete Works of Henry James: Novels, Short Stories, Plays, Essays, Autobiography and Letters Henry James, 2024-01-05

The Complete Works of Henry James presents a monumental anthology of the esteemed author's literary output encompassing not only his novels but also short stories, plays, essays, autobiography, and letters. Characterized by intricate prose and psychological depth, James's works explore themes of consciousness, social dynamics, and cultural juxtaposition, predominantly situated within the nuanced milieu of 19th and early 20th century Europe and America. This compilation allows readers to traverse the breadth of his evolution as a writer, revealing his unique narrative techniques and his meticulous attention to the subtleties of human experience.

Henry James, an American expatriate who spent significant time in Europe, was deeply influenced by the artistic and cultural movements of his time. His works often reflect his own transatlantic identity, grappling with the conflicts between American optimism and European sophistication. James's rich intellectual life, spent among contemporaries such as Edith Wharton and Joseph Conrad, informed his distinctive style and keen psychological insights, establishing him as a pivotal figure in literary modernism.

For readers seeking an immersive and comprehensive understanding of literary artistry, the Complete Works of Henry James is indispensable. It expertly encapsulates the complexities of human relationships and societal frameworks, making it an essential addition to any literary canon and a profound exploration of a writer whose influence continues to reverberate through modern literature.
