

Axiomatic Method

- A procedure by which we demonstrate as fact (prove) results (theorems) discovered by experimentation, observation, trial and error or “intuitive insight.”
- **Definition:** A **proof** is a sequence of statements, each of which follows logically from the ones (statements) before and leads from a statement that is known to be true, to a statement that is to be proved.
- **Note:** We use standard **2-value logic**, that is a statement is either true or false.
