Beatlemania André Millard,2021-04-27 This look at how changes in the music industry made the Fab Four phenomenon possible presents a different interpretation of a much studied topic Essays in Economic and Business History In this unique study Andr Millard argues that despite the Beatles indisputable skill they would not have attained the same global recognition or been as influential without the convergence of significant developments in the way music was produced recorded sold and consumed As the Second Industrial Revolution hit full swing and baby boomers came of age the reel to reel recorder and other technological advances sped the evolution of the music business Musicians recording studios and record

labels and music fans used and interacted with music making and playing technology in new ways Higher quality machines made listening to records and the radio an experience that one could easily share with others even if they weren't in the same physical space At the same time an increase in cross Atlantic commerce especially of entertainment products led to a freer exchange of ideas and styles of expression notably among the middle and lower classes in the U S and the UK At that point Millard argues the Beatles rode their remarkable musicianship and cultural savvy to an unprecedented bond with their fans and spawned Beatlemania Lively and insightful Beatlemania offers a deeper understanding the days of the Fab Four and the band's long term effects on the business and culture of pop music
