This report presents information and analysis in support of evidence based policy making that should inform the second generation of CAADP national investment plans now being developed. This is an important moment for shaping the region's future and ensuring that the much needed agriculture led growth and development agenda can simultaneously deliver on improving nutrition, saving lives, improving productivity and health and curbing nutrition related diseases and the associated public health expenditures. These investment plans should address not only the usual elements of undernutrition but also widespread micronutrient deficiencies termed hidden hunger and the growing problem of overweight and obesity that is associated with economic growth.

Lifestyle Nursing Gia Merlo, Kathy Berra, 2022-08-23. Lifestyle medicine is an evidence based approach to helping individuals and families adopt and sustain healthy behaviors in preventing, treating and oftentimes reversing chronic diseases. This fast growing specialty operates off six main principles including nutrition, physical activity, stress, resilience, cessation or risk reduction of substance use, quality sleep and social connectivity. Nurses are the primary providers of hospital based patient care and deliver most of the nation's long term care. Within healthcare, nurses are often tasked with educating patients and families and are thereby well positioned to address lifestyle intervention with patients. Lifestyle Nursing examines the concepts of lifestyle medicine and nursing practice; it is specifically designed to help nurses introduce the concepts of lifestyle medicine to readers while also encouraging them to focus on their own wellness. This book features nutritional guidelines and supplemental materials operationalizing this basic nutrition knowledge into personal and patient wellness. It addresses evidence based findings of chronic diseases including heart diseases and stroke, type 2 diabetes and cancers which can often be prevented by lifestyle interventions. Drawing from nursing and medical literature, this volume in the Lifestyle Medicine series encourages incorporation of lifestyle principles into nursing practices professionally and personally which will lead to overall improved patient outcomes and happier, healthier nurses.
