Spent Sex Evolution And Consumer Behavior:

Spent Geoffrey Miller, 2010-05-25 A leading evolutionary psychologist probes the unconscious instincts behind American consumer culture Illuminating the hidden reasons for why we buy what we do *Spent* applies evolutionary psychology to the sensual wonderland of marketing and perceived status that is American consumer culture Geoffrey Miller starts with the theory that we purchase things to advertise ourselves to others and then examines other factors that dictate what we spend money on With humor and insight Miller analyzes an array of product choices and deciphers what our decisions say about ourselves giving us access to a new way of understanding and improving our behaviors to become happier consumers

Spent Geoffrey Miller, 2009 Why do we buy Why are so many of our consumer choices simply a waste of time energy and money How does advertising really work And why are pregnant women more racist than the rest of us In this brilliantly original provocative and witty book Geoffrey Miller acclaimed author of *The Mating Mind* uses evolutionary psychology to explain the phenomenon of modern brand driven consumerism Traversing the murky terrains of marketing advertising brands media genetics neuroscience and the latest advances in evolutionary biology to explore human behavior *Spent* argues that many of our product choices are driven by the desire not to feel good but to look good by displaying our evolutionary fitness to those around us At once a searing critique of the excesses of twenty first century consumerism and a masterful new take on understanding how the mind works *Spent* is a radical timely and original book

The Future Designer Michael Leube, 2024-06-19 During periods of environmental and societal upheaval design has the potential to be a formidable catalyst towards a sustainable future However to unleash its full power significant shifts in both theory and practice are imperative This book adopts a unique approach blending anthropological perspectives with philosophy and cognitive science and advocates for a thorough transformation of the existing design curriculum Supported by a vast body of literature in evolutionary science and design research the book presents a blueprint for fostering more sustainable patterns of production and consumption This blueprint is grounded in human virtues rather than vices and proposes a new curriculum tailored towards pro sociality and sustainability Leveraging his extensive professional background and expertise in the circular economy Michael Leube offers practical examples methods and tools for implementing sustainable approaches in the practical work of experienced designers Showcasing cutting edge innovations for pro social and humanitarian design the book ultimately argues that if we change the objective of design from creating desire to creating value we can solve many of the most pressing social problems from the cooperation of citizens to sustainable cities The book will be useful for those studying and teaching design and anthropology and it will also be an important tool for practicing designers and engineers interested in learning how to design for social and ecological awareness

[The Cambridge Handbook of Evolutionary Perspectives on Sexual Psychology: Volume 2, Male Sexual Adaptations](#) Todd K. Shackelford, 2022-07-21 The interface of sexual behavior and evolutionary psychology is a rapidly growing domain rich in psychological theories and data as well as

controversies and applications With nearly eighty chapters by leading researchers from around the world and combining theoretical and empirical perspectives The Cambridge Handbook of Evolutionary Perspectives on Sexual Psychology is the most comprehensive and up to date reference work in the field Providing a broad yet in depth overview of the various evolutionary principles that influence all types of sexual behaviors the handbook takes an inclusive approach that draws on a number of disciplines and covers nonhuman and human psychology It is an essential resource for both established researchers and students in psychology biology anthropology medicine and criminology among other fields Volume 2 Male Sexual Adaptations addresses theory and research focused on sexual adaptations in human males *The Oxford Handbook of Personality and Social Psychology* Kay Deaux, Mark Snyder, 2018-10-30 The second edition of The Oxford Handbook of Personality and Social Psychology uniquely integrates personality and social psychology perspectives together in one volume Contributors explore historical conceptual methodological and empirical foundations that link the two fields together Further this new edition offers readers comprehensive coverage of new and emerging areas of theory research and application and assesses the fields growth and development since the publication of the first edition **The Interdisciplinary Science of Consumption** Stephanie D. Preston, Morten L. Kringelbach, Brian Knutson, 2014-08 Scholars from psychology neuroscience economics animal behavior and evolution describe the latest research on the causes and consequences of overconsumption Our drive to consume our desire for food clothing smart phones and megahomes evolved from our ancestors drive to survive But the psychological and neural processes that originally evolved to guide mammals toward resources that are necessary but scarce may mislead us in modern conditions of material abundance Such phenomena as obesity financial bubbles hoarding and shopping sprees suggest a mismatch between our instinct to consume and our current environment This volume brings together research from psychology neuroscience economics marketing animal behavior and evolution to explore the causes and consequences of consumption Contributors consider such topics as how animal food storing informs human consumption the downside of evolved fast and frugal rules for eating how future discounting and the draw toward immediate rewards influence food consumption addiction and our ability to save overconsumption as social display and the policy implications of consumption science Taken together the chapters make the case for an emerging interdisciplinary science of consumption that reflects commonalities across species domains and fields of inquiry By carefully comparing mechanisms that underlie seemingly disparate outcomes we can achieve a unified understanding of consumption that could benefit both science and society Extraterrestrial Altruism Douglas A. Vakoch, 2013-09-14 Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence SETI that extraterrestrials will be transmitting messages to us for our benefit This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact Technological civilizations that transmit signals for the benefit of others but with no immediate gain for themselves certainly seem to be

altruistic But does this make biological sense Should we expect altruism to evolve throughout the cosmos or is this only wishful thinking Is it dangerous to send messages to other worlds as Stephen Hawking has suggested or might humankind benefit from an exchange with intelligence elsewhere in the galaxy Would extraterrestrial societies be based on different ethical principles or would we see commonalities with Earthly notions of morality Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth providing new insights that are critical for SETI Chapters are authored by leading scholars from diverse disciplines anthropology astronomy biology chemistry computer science cosmology engineering history of science law philosophy psychology public policy and sociology The book is carefully edited by Douglas Vakoch Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies The Foreword is by Frank Drake This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth or whether they are built into the fabric of the universe The Oxford Handbook of Evolutionary Perspectives on Violence, Homicide, and War Todd K. Shackelford,Viviana A. Weekes-Shackelford,2012-08-23 This volume synthesizes the theoretical and empirical work of leading scholars in the evolutionary sciences to produce an extensive and authoritative review of this literature

Evolutionary Psychology David Buss,2015-10-02 This book examines human psychology and behavior through the lens of modern evolutionary psychology Evolutionary Psychology The New Science of the Mind 5 e provides students with the conceptual tools of evolutionary psychology and applies them to empirical research on the human mind Content topics are logically arrayed starting with challenges of survival mating parenting and kinship and then progressing to challenges of group living including cooperation aggression sexual conflict and status prestige and social hierarchies Students gain a deep understanding of applying evolutionary psychology to their own lives and all the people they interact with *Narrative Complexity* Marina Grishakova,Maria Poulaki,2019-08-01 The variety in contemporary philosophical and aesthetic thinking as well as in scientific and experimental research on complexity has not yet been fully adopted by narratology By integrating cutting edge approaches this volume takes a step toward filling this gap and establishing interdisciplinary narrative research on complexity Narrative Complexity provides a framework for a more complex and nuanced study of narrative and explores the experience of narrative complexity in terms of cognitive processing affect and mind and body engagement Bringing together leading international scholars from a range of disciplines this volume combines analytical effort and conceptual insight in order to relate more effectively our theories of narrative representation and complexities of intelligent behavior This collection engages important questions on how narrative complexity functions as an agent of cultural evolution how our understanding of narrative complexity can be extended in light of new research in the social sciences and humanities how interactive media produce new types of narrative complexity and how the role of embodiment as a factor of narrative complexity acquires prominence in cognitive science and media studies The contributors explore narrative complexity

transmitted through various semiotic channels embedded in multiple contexts and experienced across different media including film comics music interactive apps audiowalks and ambient literature
