Social Change: Globalization from the Stone Age to the Present

By Christopher Chase-Dunn and Bruce Lerro. Pp. xxxii + 433, figs. 55, tables 30. Paradigm Publishers, Boulder 2014. \$69.95. ISBN 978-1-61205-328-8 (paper).

The authors of this book set a truly ambitious agenda: to analyze social change over the last 12,000 years, during which humans moved from foraging to farming, culminating in the emergence of states. They link large-scale systemic developments to the formation of individual social identity, the different forms of which respond to changes in a culture as a whole. To do so, they consider data from anthropology, archaeology, sociology, history, and psychology. No doubt experts in one field or another will find fault with some of the particular statements or ways that the authors handle specific data sets, but it would be a great folly to dismiss the work as a whole. The authors ask big questions that require appropriately large answers. We should pay attention to the major trends they identify and the framework they employ to study cultural evolution. This is a remarkable piece of scholarship that deserves a wide audience.

The book is divided into four sections, the first of which (chs. 1–4) presents the theoretical framework of institutional materialism and the comparative world-systems approach that underlie the subsequent analysis. They note that “scientific social change theory is about probabilities, not inevitabilities” (10). In so doing, they emphasize the mutual interaction between human agency and the constraints imposed by socialization. Core/periphery relations are framed in terms of different networks (political-military, bulk goods, prestige goods, and information) that define the nature of intersocietal interaction. Semiperipheries emerge as sources of innovation; semiperipheral marcher states (e.g., Achaemenid Persians, Macedonians, Romans, Ottomans, Aztecs) created the largest empires, typically through a tributary mode of accumulation. In addition, certain semiperipheral city-states in Europe developed capitalism and transformed the trade networks. To bridge the gap between large-scale social institutions and events on the one hand and individuals on the other, the authors incorporate key concepts from Mead, Goffman, and others to discuss the development of social selves in collectivist and individualist settings. They link the development of abstract thought over time to particular technological advances.

In part 2 (chs. 5–7), Chase-Dunn and Lerro deal with the development of stateless systems. They discuss foragers and early agriculturalists as horizontal collectivist selves because of the egalitarian nature of social and economic relations within such groups. Nonetheless, small world-systems in which various goods circulate among the groups over considerable distances can form. The authors then provide an excellent treatment of chiefdom systems in North America and Hawaii in which the prestige-goods network becomes
