Bellamy,Timothy Dunne,2016 The Responsibility to Protect R2P is intended to provide an effective framework for responding to crimes of genocide ethnic cleansing war crimes and crimes against humanity It is a response to the many conscious shocking cases where atrocities on the worst scale have occurred even during the post 1945 period when the United Nations was built to save us all from the scourge of genocide The R2P concept accords to sovereign states and international institutions a responsibility to assist peoples who are at risk or experiencing the worst atrocities R2P maintains that collective action should be taken by members of the United Nations to prevent or halt such gross violations of basic human rights This Handbook containing contributions from leading theorists and practitioners including former foreign ministers and special advisors examines the progress that has been made in the last 10 years it also looks forward to likely developments in the next decade **Contracting Human Rights** Alison Brysk,Michael Stohl,2018 By chronicling the continuing contest over the reach range and regime of rights Contracting Human Rights analyzes the way forward in an era of many challenges This multidisciplinary book contributes to building understanding of the maturation of human rights from a dissident doctrine to a dynamic parameter of global governance and civil society Through an examination of both global and local challenges to human rights including loopholes backlash accountability and new opportunities to move forward this book analyzes trends across multiple issue areas *International Human Rights Law in Africa* Christof Heyns,Morne van der Linde,2022-11-07 Contrary to popular belief there is a vast body of law dealing with human rights in Africa in existence today The first priority at the moment is consequently not the adoption of new norms or the creation of even more structures the most immediate challenge lies in making the existing structures work and ensuring compliance with the norms already accepted by African societies Access to the relevant material constitutes a necessary precondition for any other gains in this field The aim of this reference work is therefore to make African human rights law accessible to all those involved in or interested in human rights law on the continent in order to strengthen its impact Primary documents are introduced and reproduced and presented in a coherent framework The main institutions public and private dealing with human rights in Africa are identified and discussed Comprehensive overviews of the international human rights legal regimes applicable to Africa as well as country reports are provided Access to this body of law will enable judges practicing lawyers academics and other researchers as well as law reformers NGOs activists and students to both ascertain and assert these rights It will also serve to ensure the development of a stronger indigenous African human rights jurisprudence rooted in local experience history culture and practices This book consequently tries to contribute towards documenting systemising and anchoring the African human rights system This publication replaces and updates the earlier Human Rights Law in Africa Series which appeared on an annual basis from 1996 to 1999 In order to make the publication accessible in Africa the Centre for Human

Rights and the Raoul Wallenberg Institute in Sweden have undertaken a targeted distribution campaign on the continent The print edition is available as a set of two volumes 9789004138810
