

How do the perspectives of UK university students, as expressed on Reddit, evolve over time?

Examining key themes and sentiment trends from r/UKUni posts (2014-2023) to understand the changing perspectives and emotional dynamics of UK university students.

BACKGROUND	TOPIC ANALYSIS	SENTIMENT ANALYSIS	TOPIC DATA	INTERPRETATION
------------	----------------	--------------------	------------	----------------

Interpretation, Limitations and Future Direction

The topic frequency graph provides an overview of the most prevalent themes discussed by UK university students on Reddit over time. Notably, while student count shows an increasing trend for all topics as the subreddit grows, it is particularly for Topic 1 (University Life) that the data allows us to identify the relative prominence of each topic over time. Among the top topics, we find a mix of academic concerns (e.g., accommodation, university applications), social aspects (e.g., finding friends, loneliness), and personal well-being (e.g., mental health, finance). First, the prominence of topics such as job, university choice and applications, accommodation and finance highlight the practical challenges that students face in their university journey. Secondly, students use such social media platforms as an avenue of seeking help and advice from other UK university students who have experienced similar concerns. These discussions not only provide valuable peer-to-peer support but also offer insights into the common struggles and decision-making processes of students.

However, it is important to acknowledge the limitations of this study. First, it is a cross-sectional study and cannot capture longitudinal changes. The data also does not account for the impact of external factors such as the COVID-19 pandemic, which significantly impacted university life and mental health. Future research could explore these factors and their impact on student perspectives.
