Helen E. Mundler

Framework Cli Fi Novel:

The Noah Myth in Twenty-first-century Cli-fi Novels Helen E. Mundler, 2022 Breaks new ground by both analyzing the literary qualities of four recent rewritings of the Noah myth and contextualizing their concern with climate change within the wider crises of the Anthropocene. With the rise of concern about global warming in recent years, climate change fiction or cli-fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research. Flood narratives have become a subsection of cli-fi in their own right. This book proposes new readings of four recent rewritings of the Noah myth: *Odds Against Tomorrow* by Nathaniel Rich, Margaret Atwood's *Maddaddam* trilogy, *When the Floods Came* by Clare Morrall, and *The Flood* by Maggie Gee. Helen E. Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years, acknowledging important contributions from critics including Adam Trexler, Adeline Johns Putra, and Astrid Bracke. However, her book's strength is that it takes a new approach, going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. While the importance of climate change is beyond debate, this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene. y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. Teaching the Literature of Climate Change Debra J. Rosenthal, 2024-04-26 Over the past several decades, writers such as Margaret Atwood, Paolo Bacigalupi, Octavia E. Butler, and Kathy Acker have explored climate change through literature, reflecting current anxieties about human impact on the planet. Emphasizing the importance of interdisciplinarity, this volume embraces literature as a means to cultivate students' understanding of the ongoing climate crisis, ethics in times of disaster, and the intrinsic intersectionality of environmental issues. Contributors discuss speculative climate futures, the Anthropocene, postcolonialism, climate anxiety, and the usefulness of storytelling in engaging with catastrophe. The essays offer approaches to teaching interdisciplinary and cross-listed courses, including strategies for team teaching across disciplines and for building connections between humanities majors and STEM majors. The volume concludes with essays that explore ways to address grief and to contemplate a hopeful future in the face of apocalyptic predictions.
