The Trauma Heart Judy Crane, 2017-06-27 The majority of people addicted to substances or process addictions such as relationship disorders eating disorders self harming behaviors gambling or pornography are trauma survivors Many people caught in the web of addiction don't identify as trauma survivors until their personal familial intergenerational and in uterine history is exposed

Unfortunately relapse is inevitable without trauma resolution that can only take place once their history is exposed. It is only when that happens that the behavior disorders will finally make sense. For almost 30 years Judy Crane has worked with clients and families who are in great pain due to destructive and dangerous behaviors. Families often believe that their loved one must be bad or defective and the one struggling with the addiction not only believes it too but feels it to their core. The truth is the whole family is embroiled in their own individual survival coping mechanisms; the addicted member is often the red flag indicating that the whole family needs healing. In *The Trauma Heart* Crane explores the many ways that life's events impact each member of the family. She reveals the essence of trauma and addictions treatment through the stories, art, and assignments of former clients and the staff who worked with them, offering a snapshot of their pain and healing.

Trauma-Informed Music Therapy Laura E. Beer, Jacqueline C. Birnbaum, 2022-08-30 *Trauma Informed Music Therapy* is a timely volume that combines theoretical perspectives on trauma informed practice with real life applications in music therapy practice. Board certified music therapists are in a unique position to provide comfort, create a sense of safety, and empower people to find their voice during and after traumatic experiences. In this book the theory behind trauma informed practice (TIP) is explored and expanded through stories of clinical implementation, social justice practices, and music therapy theories. Spanning topics such as grief and loss, adverse childhood experiences, and their intergenerational effects, domestic abuse, urban trauma, polyvagal theory, and psychological first aid, this book addresses music therapy as the emerging therapeutic treatment modality for adults, children, and teenagers alike. This book will be of interest to practicing music therapists and music therapy students who are learning how to bring music therapy to victims and survivors of trauma.
