White Coat, Black Hat Carl Elliott, 2011-09-13 By New Yorker and Atlantic writer Carl Elliott a readable and even funny account of the serious business of medicine A tongue in cheek account of the changes that have transformed medicine into big business Physician and medical ethicist Carl Elliott tracks the new world of commercialized medicine from start to finish introducing the professional guinea pigs ghostwriters thought leaders drug reps public relations pros and even medical ethicists who use medicine for sometimes huge financial gain Along the way he uncovers the cost to patients lost in a health care universe centered around consumerism **The Climate Crisis** Adam Aron, 2022-12-22 Why despite all we know about the causes and harms of global heating has so little effective action been taken to cut greenhouse gas emissions and what we can do to change that This book explains the mechanisms and impacts of the climate crisis traces the history and reasons behind the lack of serious effort to combat it describes some people's ongoing scepticism and how to shift it and motivates an urgent program of action It argues that the pathway to stopping dangerous global heating will require a much larger mobilization of advocacy and activism to impel decision makers to abandon fossil fuels and transition to renewable energy and electrification embedded in a political and social framework guided by justice principles It is an excellent resource for students and researchers on the climate crisis the need for a renewable energy transition and the current blocks to progress

Knowledge Production in and on Africa Hana Horáková, Katerina Werkman, 2016 The book presents a broad and multi dimensional perspective on the topic of knowledge production in and of Africa and seeks changing its post imperial pattern

This endeavour reflects the concern that in our globalised world Africa is misrepresented twice by the ways knowledge about it is selected by gatekeepers of knowledge and by deliberate suppression of knowledge on Africa. The contributions to this volume address diverse aspects of knowledge production: they examine the existing knowledge producing frontiers in Africa; they challenge methodological and theoretical universalisms in social science scholarship on the African continent; they look into the interface between the indigenous and modern knowledge systems and the role of African epistemologies and intellectuals in the production of knowledge.

The H5N1 Virus Philip R. Egert, 2019-11-18. This book is the first study of its kind that reveals the social justice linkages between three unique characteristics of the highly pathogenic avian influenza H5N1 virus: namely, veterinary scourge, public health contagion, fear, and potential bioterrorist weapon. With its extensive referencing, it will be invaluable for scholars of security studies, global public health, and international relations, as well as for professionals, diplomats, and practitioners with an interest in the relationship between global health security and social justice. Comprised of two major sections, the book examines the various representations of knowledge about the H5N1 virus. The first part explores the three major narratives that were used to describe the virus during its 20-year journey from 1996 to 2016. During this time, the virus multiplied its ontological status through narratives that described a localized animal virus, a global public health crisis, and finally, an irrational contagion fear. The text's second section describes in detail a unique aspect of the H5N1 virus's journey as an emerging infectious disease: its representation as a potential weapon for bioterrorists. As a result, the US government attempted to secure knowledge about the H5N1 virus. This attempt produced a global debate between scientists and policy makers over how to balance the nation state's desire for security with the life sciences tradition of openly shared research. Known as the dual use dilemma, this debate set up binaries of impossible reconciliation between the scientific and security communities. This book argues that the H5N1 dual use dilemma obscures larger questions of justice and proposes a new concept of justice knowledge: justice as an alternate, more globally inclusive framework for exploring a socially just way out of the dilemma.

The Pentagon's Brain Annie Jacobsen, 2015-09-15. Discover the definitive history of DARPA, the Defense Advanced Research Project Agency, in this Pulitzer Prize finalist from the author of the New York Times bestseller *Area 51*. No one has ever written the history of the Defense Department's most secret, most powerful, and most controversial military science R & D agency. In the first ever history about the organization, New York Times bestselling author Annie Jacobsen draws on inside sources, exclusive interviews, private documents, and declassified memos to paint a picture of DARPA, or the Pentagon's brain, from its Cold War inception in 1958 to the present. This is the book on DARPA, a compelling narrative about this clandestine intersection of science and the American military, and the often-frightening results.
