Metamorphic Imagery in Ancient Chinese Art and Religion Elizabeth Childs-Johnson, John S Major, 2023-05-30

Metamorphic Imagery in Ancient Chinese Art and Religion demonstrates that the concept of metamorphism was central to ancient Chinese religious belief and practices from at least the late Neolithic period through the Warring States Period of the Zhou dynasty Central to the authors argument is the ubiquitous motif in early Chinese figurative art the metamorphic power mask While the motif underwent stylistic variation over time its formal properties remained stable underscoring the image s ongoing religious centrality It symbolized the metamorphosis through the phenomenon of death of royal personages from living humans to deceased ancestors who required worship and sacrificial offerings Treated with deference and respect the royal ancestors lent support to their living descendants ratifying and upholding their rule neglected they became dangerous even malevolent Employing a multidisciplinary approach that integrates archaeologically recovered objects with literary evidence from oracle bone and bronze inscriptions to canonical texts all situated in the appropriate historical context the study presents detailed analyses of form and style and of change over time observing the importance of relationality and the dynamic between imagery materials and affects This book is a significant publication in the field of early China studies presenting an integrated conception of ancient art and religion that surpasses any other work now available **Britannica**

Oxygen and the Brain: The Journey of Our Lifetime Philip B. James, 2014-06-01 Man has conquered Everest been to the bottom of the deepest ocean and even walked on the Moon by understanding pressure and oxygen But the one area of life the technology has not influenced is the practice of medicine Billions have been spent researching drugs to treat the brain and they have failed drug companies are closing their neuroscience laboratories This is because there is no substitute for oxygen As the most astonishing discovery since DNA was unraveled has shown oxygen the gas in the air we all breathe controls our most important genes If we are sick or seriously injured and in intensive care the amount of oxygen we can be given is limited by the weather Without a simple pressure chamber we are forced to accept a variation of more than 10% when just 2% more oxygen on the summit of Everest can mean the difference between life and death We have already engineered the solution the technology used in aircraft that sustains us flying at 40 000 feet can facilitate medical recovery safely on the ground This book follows the human journey from conception to old age and presents evidence amassed over more than a century that can transform the care of patients with birth injury head trauma multiple sclerosis stroke and even reverse decline in old age There is no more necessary and scientific action than to correct a deficiency of oxygen especially in the brain and it is simple to give more
