Skyscraper Bioclimatically Considered A Design Primer:

The Skyscraper Bioclimatically Considered Ken Yeang, 1996 An innovative study of this building type **The Design Scenarios Methodology - Enabling Requirements-driven Design Spaces** Victor Gane, 2011 During the conceptual design process the building shape orientation materials and other major properties are established all of which have a substantial impact on multi aspect performance In this process multidisciplinary teams define project objectives create various alternatives and try to understand their impacts and value With non parametric Computer Aided Design CAD methods designers produce and analyze as few as three alternatives whereas with parametric CAD they can generate thousands However with current parametric methods CAD experts lack a comprehensive method to build and analyze multi objective parametric models Therefore the resulting models do not effectively encapsulate multi objective value measures This research introduces the Design Scenarios Methodology DS which builds on research from Systems Engineering Process Modeling and Parametric Modeling With DS Enablers use Methods to create Elements using five interconnected models to define 1 project stakeholders and their objectives 2 designer logic used to address objectives 3 the connection between designer logic and computable models to generate alternatives 4 the predicted impact and 5 value of the generated alternatives I implemented DS as a web based software prototype and tested it on an industry project The results provide evidence that the DS method provides CAD experts with well defined logic and parameters for addressing objectives and the process enables creating parametric alternatives with clear multi objective values that potentially provide clients with better building designs This thesis lays the foundation for future research on automating the design alternative generation and analyses processes by leveraging such well established methods as Multi Disciplinary Optimization *Tall Buildings: From Engineering To Sustainability* Y K Cheung, Kwong Wing Chau, 2005-12-06 A collection of papers presented at the Sixth International Conference on Tall Buildings ICTB this volume clearly explains the engineering and socio economic aspects of tall buildings in specific areas of sustainability The papers focus on Asian cities where tall buildings have become a major feature of the built environment A multi disciplinary book it also deals with the increasing complexity of inter related problems that require knowledge integration from different disciplines With interesting contributions from distinguished practitioners academics and policy makers the book addresses the development and application of knowledge in solving problems related to tall buildings *Rethinking Technology* William W. Braham, Jonathan A. Hale, 2006-12-05 This essential reference for all students of architecture design and the built environment provides a convenient single source for all the key texts in the recent literature on architecture and technology The book contains over fifty carefully selected essays manifestoes reflections and theories by architects and architectural writers from 1900 to 2004 This mapping out of a century of architectural technology reveals the discipline s long and close attention to the experience and effects of new technologies and provides a

broad picture of the shift from the age of tools to the age of systems Chronological arrangement and cross referencing of the articles enable both a thematic and historically contextual understanding of the topic and highlight important thematic connections across time With the ever increasing pace of technological change this Reader presents a clear understanding of the context in which it has and does affect architecture

Collaborative Construction Information Management Geoffrey Shen, Peter Brandon, Andrew Baldwin, 2009-06-02 Most construction projects are large and costly Collaborative working involves two or more stakeholders sharing their efforts and resources to complete the project more effectively and efficiently Collaborative integrative and multi disciplinary teams can tackle the complex issues involved in creating a viable built environment This tends to be looked at from three interrelated perspectives the technological organizational and social and of these the key issue is to improve productivity and enable innovation through the empowerment and motivation of people This book provides insights for researchers and practitioners in the building and construction industry as well as graduate students written by an international group of leading scholars and professionals into the potential use development and limitations of current collaborative technologies and practices Material is grouped into the themes of advanced technologies for collaborative working virtual prototyping in design and construction building information modelling managing the collaborative processes and human issues in collaborative working

The Top Books of the Year Skyscraper Bioclimatically Considered A Design Primer The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have enthralled audiences this year.

Skyscraper Bioclimatically Considered A Design Primer : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and gripping novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
