works for instance Penny Dreadful and Anita Blake The authors address the sociocultural institutions that bind gender to the body and shape our views of gendered norms inviting students of all experience levels to engage in interdisciplinary conversations about both theoretical and embodied constructions of gender and the production of genre and generic conventions The text unpacks cultural norms of gender and addresses issues of identity construction within an endlessly evolving genre This collection demonstrates the way that representations of gender and the kick ass female urban fantasy warrior have upended and reinforced a broad range of expectations and tropes making it a fascinating text for any course such as first year studies literature film gender studies sociology cultural studies history and more **Motherducking**

Woman, and Urban Culture Emma Liggins, 2017-09-29 George Gissing s work reflects his observations of fin de si cle London life Influenced by the French naturalist school his realist representations of urban culture testify to the significance of the city for the development of new class and gender identities particularly for women Liggins s study which considers standard texts such as The Odd Women New Grub Street and The Nether World as well as lesser known short works examines Gissing s fiction in relation to the formation of these new identities focusing specifically on debates about the

Ordinary Cities Jennifer Robinson,2013-07-04 With the urbanization of the world s population proceeding apace and the equally rapid urbanization of poverty urban theory has an urgent challenge to meet if it is to remain relevant to the majority of cities and their populations many of which are outside the West This groundbreaking book establishes a new framework for urban development It makes the argument that all cities are best understood as ordinary and crosses the longstanding divide in urban scholarship and urban policy between Western and other cities especially those labelled Third World It considers the two framing axes of urban modernity and development and argues that if cities are to be imagined in equitable and creative ways urban theory must overcome these axes with their Western bias and that resources must become at least as cosmopolitan as cities themselves Tracking paths across previously separate literatures

and debates this innovative book a postcolonial critique of urban studies traces the outlines of a cosmopolitan approach to cities drawing on evidence from Rio Johannesburg Lusaka and Kuala Lumpur Key urban scholars and debates from Simmel Benjamin and the Chicago School to Global and World Cities theories are explored together with anthropological and developmentalist accounts of poorer cities Offering an alternative approach Ordinary Cities skilfully brings together theories of urban development for students and researchers of urban studies geography and development

Consumption and the World of Goods John Brewer, Roy Porter, 2013-06-17 The study of past society in terms of what it consumes rather than what it produces is relatively speaking a new development The focus on consumption changes the whole emphasis and structure of historical enquiry While human beings usually work within a single trade or industry as producers as say farmers or industrial workers as consumers they are active in many different markets or networks And while history written from a production viewpoint has by chance or design largely been centred on the work of men consumption history helps to restore women to the mainstream The history of consumption demands a wide range of skills It calls upon the methods and techniques of many other disciplines including archaeology sociology social and economic history anthropology and art criticism But it is not simply a melting pot of techniques and skills brought to bear on a past epoch Its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services Consumption and the World of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty six leading subject specialists from Europe and North America The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services
