The Language of Argumentation Ronny Boogaart, Henrike Jansen, Maarten van Leeuwen, 2021-01-20 Bringing together scholars from a broad range of theoretical perspectives The Language of Argumentation offers a unique overview of research at the crossroads of linguistics and theories of argumentation In addition to theoretical and methodological reflections by leading scholars in their fields the book contains studies of the relationship between language and argumentation from two different viewpoints While some chapters take a specific argumentative move as their point of departure and investigate the ways in which it is linguistically manifested in discourse other chapters start off from a linguistic construction trying to determine its argumentative function and rhetorical potential The Language of Argumentation documents the currently prominent research on stylistic aspects of argumentation and illustrates how the study of argumentation benefits from insights from linguistic models ranging from theoretical pragmatics politeness theory and metaphor studies to models of discourse coherence and construction grammar
