The Complete Technology Book on Textile Spinning, Weaving, Finishing and Printing (3rd Revised Edition) NIIR Board of Consultants & Engineers, 2017-09-09 Textile industry is one of the few basic industries which is characterised as a necessary component of human life. One may classify it as a more glamorous industry, but whatever it is, it provides with the basic requirement called clothes. Spinning is the process of converting cotton or manmade fibre into yarn to be used for weaving and knitting. Weaving is a method of textile production in which two distinct sets of yarns or threads are interlaced at right angles to form a fabric or cloth.
