Entrepreneur Jesse Krieger, 2014-03-01 Make Money Doing What You Love Even in Tough Times Lifestyle Entrepreneur is the result of having lived a non traditional life. In my twenties I launched five businesses and sold the last two. I have been in a rock band touring America and I've been flown around the world as a professional dating coach. I have traveled to and lived in over twenty five countries learning the local languages while there. I feel very blessed to have friends all over the world, a family that loves me at home, and generally able to live the life that I've always dreamed of. But this book isn't about me. It's about you. If you take only 10 percent of the information and ideas in this book and put them into practice, it will change your life. I promise. Lifestyle Entrepreneur contains the essence of everything I've learned over the last ten years of starting businesses, traveling the world, and exploring the things I'm passionate about. Now I would like to share a blueprint for how you can do all of these things and more. Are you ready? **Next Generation Roadmapping** Tugrul U. Daim, Robert Phaal, Dirk Meissner, Clive Kerr, 2023-10-07 Roadmapping is a structured visual approach for supporting strategic technology and innovation management, providing strategic navigational support. Hence the roadmap metaphor for technologists, designers, entrepreneurs, programme managers, executives, policy makers, other stakeholders involved in the formulation and implementation of strategy. This book brings together the latest developments in roadmapping, covering a range of practical issues and conceptual aspects. First, the book delves into the critical topic of strategic alignment within organizations, encompassing the interdependencies and synchronization of horizontal and vertical systems, connecting innovation priorities to strategic objectives and the integration of key performance indicators. Then, the book concentrates on practical techniques and tools for roadmapping, including a template-based approach for technology venture funding. Social and digital aspects of roadmapping are explored, including workshop methods considering how quantitative analysis and qualitative expert knowledge can be combined for improved strategic planning. Finally, a series of new case studies focusing on energy systems in Sub-Saharan Africa and Turkey illustrate the practical application of technology roadmapping and also provide useful insights. Roadmapping continues to evolve as it is adapted to apply to new domains and strategic challenges, propagates to new sectors, and as new digital technologies such as AI emerge that radically affect strategy and innovation processes. The need for structured and engaging approaches such as roadmapping for navigating towards the future is essential. **The**

Entrepreneurial Ecosystem in Ethiopia Mulu Gebreeyesus, Habtamu Legas, Abebe Ayana, 2025-09-16 This book investigates Ethiopia's entrepreneurial ecosystem assessing how entrepreneurship and small business development are being fostered and identifying gaps and opportunities for further positive change. The second most populous country in Sub-Saharan Africa, Ethiopia is marked by a growing economy and a dynamic entrepreneurial landscape. This book adopts a multi-level analytical framework to assess the actors, processes, and institutions that shape entrepreneurship in Ethiopia, capturing dynamics at the macro (national), meso (industry), and micro (firm) levels. The macro-level analysis benchmarks Ethiopia's ecosystem performance against peer African countries. The meso-level evaluates industry-specific support structures, including business networks and the availability and sustainability of business development services (BDS). At the micro-level, the focus is on how firms access, use, and are impacted by ecosystem resources and business support services. Combining quantitative and qualitative research, the book shows how industry-specific BDS are integral to the broader entrepreneurial ecosystem. Providing an important case study of the role of entrepreneurship and small businesses in economic and social development, this book will be an important read for researchers across business economics and development studies, as well as for policymakers responsible for implementing strategies and policies to support entrepreneurship and small business development.

Public Policy in an Entrepreneurial Economy Zoltan J. Acs, Roger R. Stough, 2008-07-03 In recent years, there has been increased focus on understanding the dynamic relationships among entrepreneurship, policymaking, and economic growth. At the heart of research, debate, and practical application is the question: Under what conditions can entrepreneurship flourish? And the corollary: To what degree does encouraging entrepreneurship result in economic growth? A popular response is to argue for entrepreneurship policy that is targeted policies that are designed to promote innovation, entrepreneurship, and small business creation. To the editors and contributors of this volume, that approach is fundamentally flawed. They argue that there is no such thing as a discrete entrepreneurship policy; instead, there is only policymaking in the context of an entrepreneurial economy. The book addresses policies operating at the individual, national, regional, and international levels and offers a unique perspective on several institutional structures that enhance entrepreneurship and economic growth.
