Using the Engineering Literature Bonnie A. Osif, 2016-04-19 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links

Analysis, Design and Construction of Foundations Yung Ming Cheng, Chi Wai Law, Leilei Liu, 2024-05-28 Analysis Design and Construction of Foundations covers the key concepts in the analysis and design of foundation systems balancing theory with engineering practice The book examines in depth the methods used for the analysis design and construction of shallow foundations deep foundations excavation and lateral support systems slope stability and stabilization and ground monitoring for proper site management Some new and innovative foundation construction methods are also introduced It is illustrated with case studies of failures and defects from actual construction projects This second edition is extensively revised and developed to include a new chapter on numerical methods in geotechnical engineering as well as a large number of new construction drawings project photos and construction method statements from existing projects to give the book a stronger professional application and connection to engineering practice It also covers some new advanced theoretical concepts not covered in other texts making it useful in both the theoretical and practical aspects It is ideal for senior undergraduates and graduate students academics and consulting geotechnical engineers

Foundation Engineering Handbook Hsai-Yang Fang, 2013-06-29 More than ten years have passed since the first edition was published During that period there have been a substantial number of changes in geotechnical engineering especially in the applications of foundation engineering As the world population increases more land is needed and many soil deposits previously deemed unsuitable for residential housing or other construction projects are now being used Such areas include problematic soil regions mining subsidence areas and sanitary landfills To overcome the problems associated with these natural or man made soil deposits new and improved methods of analysis design and implementation are needed in foundation construction As society develops and living standards rise tall buildings transportation facilities and industrial complexes are increasingly being built Because of the heavy design loads and the complicated environments the traditional design concepts construction materials methods and equipment also need improvement Further recent energy and material shortages have caused additional burdens on the engineering profession and brought about the need to seek alternative or cost saving methods for foundation design and construction

Craig's Soil Mechanics, Seventh Edition R.F. Craig, 2004-02-19 This seventh edition of Soil Mechanics widely praised for its clarity depth of explanation and extensive coverage presents the fundamental principles of soil mechanics and illustrates how they are applied in practical situations Worked examples throughout the book reinforce the explanations and a range of problems for the reader to solve provide further learning opportunities

Probabilistic Solutions in Geotechnics L. Rétháti, 2012-12-02 This is the first

monograph to consider the possibility of utilizing probability theory in all essential fields of geotechnics It deals in detail with in situ and laboratory tests the evaluation of soil physical characteristics the preparatory phase and the individual problems of design including load bearing capacity prediction of settlements dimensioning of slopes and retaining walls and quality control of earthworks Numerous possibilities for and examples of the parallel utilization of deterministic and stochastic methods are given in the book creating a connection between conventional and new modern methodologies It demonstrates by examples that the only possibility of meeting technical and economic requirements simultaneously is by using the methods of probability theory The book also gives an account of new geotechnical and mathematical results of the author post evaluation of settlements and tilts plotting of statistical bore profiles elimination of the asymmetry of distribution by transformation etc The book enables practitioners and to acquire new modern design methods and research to develop methods It will also be useful for undergraduate and postgraduate training
