An International Annotated Bibliography of Strindberg Studies

1870-2005: General studies Michael Robinson, 2008 This copiously annotated bibliography documents and examines the whole range of commentary on Strindberg's works and activity in many fields besides the plays for which he is internationally best known. These include his prose fiction and poetry, his work as an historian and natural historian and his relationship to the other arts, most notably his painting. It is concerned with both lasting works of literary and dramatic criticism as well as reviews of his books and plays in the theatre and some more ephemeral material, all of this in several languages. Organised generically and by subject and individual work, the bibliography enables the reader to trace the changing impact of Strindberg and his works in various countries and during different periods. It is thus very much a study in reception as well as a bibliographical record of published material. It traces the developing image of Strindberg and his writing both during his lifetime and in subsequent years and with frequent cross reference offers a comprehensive overview of a literary and existential project that has rarely been matched for its multifaceted diversity. The bibliography is published in three parts. Volume 2: The Plays 978 0 947623 82 1 and Volume 3: Prose Poetry Miscellaneous 978 0 947623 83 8 are also now available. Michael Robinson is Emeritus Professor of Drama and Scandinavian Studies at the University of East Anglia, Norwich.

A Theory of the Tache in Nineteenth-Century Painting Stein Sjøvold, 2017-07-05 Without question the tache, blot, patch, stain is a central and recurring motif in nineteenth-century modernist painting. Manet's and the Impressionists' rejection of academic finish produced a surface where the strokes of paint were presented directly as patches or blots, then indirectly as legible signs. C. J. van Seurat and Signac painted exclusively with patches or dots. Through a series of close readings, this book looks at the tache as one of the most important features in nineteenth-century modernism. The tache is a potential meeting point between text and image and a pure trace of the artist's body. Even though each manifestation of tacheism generates its own specific cultural effects, this book represents the first time a scholar has looked at tacheism as a hidden continuum within modern art. With a methodological framework drawn from the semiotics of text and image, the author introduces a much-needed fine-tuning to the classic terms: index, symbol, and icon. The concept of the tache as a crossing of sign types enables finer distinctions and observations than have been available thus far within the Peircean tradition. The sign-crossing theory opens onto the whole terrain of interaction between visual art, art criticism, literature, philosophy, and psychology.
