100 [Sto] let padagogiky, 1982 **Mystic Universe** Ashish Dalela, 2016 *The Structure of the Universe* Jayant Vishnu Narlikar, 1977 *The Structure of the Universe* Paul Halpern, 1997-01 Examines current research to explain quasars black holes the big bang pulsars and galactic rhythms for the layperson *Creation of the Universe* Srikanth s, Important modern scientific truths lie hidden in the highly colourful and symbolical language of the Vedas Brahma does not mean the theological object of worship but it means atomic state which pervades in 58 digits The ancients measured distances not even in astronomical light years that proved inadequate but in number of digits Hiranyaksha should not be taken as a demon It indicates gravitational power of the molten matter inside the earth Dhaataa or Brahmaa is a star standing at a distance of 39 digits and Sarasvatee is its cosmic energy The Universe as a whole is contracting The Earth began to cool 1 000 000 000 000 1 followed by 12 zeroes years ago Universe will go on contracting till it finally collapses in 33 digits of years according to our planet Om is not a mere sound but an actual cosmic state which comes into being when at the initial stage the three Gunas of Prakriti give rise by their interaction to the four states of matter called the charges atomic molecule and particle states and consequently has dimensions like a concrete substance Gods are stars with supernatural powers such as the cosmic rays attraction repulsion etc Shiva and Paarvattee are the names given to the spiritual and material aspects **Vedic Cosmology** Rachel Bakers, The Vedic cosmology represents one of humanity s most sophisticated and comprehensive attempts to understand the universe as a living conscious entity operating according to divine principles that govern everything from the movement of celestial bodies to the evolution of consciousness itself This ancient Indian worldview preserved in the Vedas and elaborated upon in subsequent texts like the Puranas and Upanishads presents a cosmos that is simultaneously physical and metaphysical temporal and eternal finite and infinite revealing layers of meaning that continue to inspire both spiritual seekers and scientific thinkers At the heart of Vedic cosmology lies the concept of Brahman the ultimate reality that serves as both the material and efficient cause of the universe Brahman is described as existence consciousness bliss absolute a unified field of pure awareness from which all phenomena emerge and into which they eventually dissolve This is not a personal deity but rather the very essence of being itself the unchanging foundation upon which the entire cosmic drama unfolds The Vedic seers understood that this absolute reality manifests through various levels of existence creating the appearance of multiplicity while remaining fundamentally one The creative process begins with the emergence of Hiranyagarbha the cosmic golden egg or womb from the depths of Brahman s infinite potential This primordial matrix contains within itself all the possibilities of manifestation much like a seed contains the entire tree in potential form From Hiranyagarbha emerges Brahma the creative aspect of divinity who begins the process of cosmic manifestation through the power of thought and word The Vedic understanding recognizes that creation is fundamentally a mental process with the universe being projected from cosmic consciousness like a dream arising from the mind of a dreamer **The Artful**
