The Aesthetics of Discipleship Adrian Coates, 2021-09-30 Discipleship is embodied Formation in the Christian life is not an otherworldly exercise but one that plays out in this world interwoven with everyday sensory experience in ordinary life The Aesthetics of Discipleship explores this dynamic through Kierkegaard's framing of aesthetic existence the sensory experience of being in the moment further developed by Bonhoeffer as operating within a realm of freedom encompassing not only art but play friendship and cultural formation In addition to Kierkegaard and Bonhoeffer the work of Iain McGilchrist Graham Ward and Nicholas Wolterstorff is employed to offer a fresh perspective on discipleship from below Everyday sensory experiences are integral not only to being human but to the practice of discipleship such that discipleship integrates aesthetic ethical and religious existence Aesthetic existence unhinged from a life of faith or fueled by distorted Christendom creates and sustains aestheticized pseudorealities centered on the self Mature aesthetic existence however anchored in love for God plays a fundamental role in the Christian life both as the incarnational celebration of being fully human and also through the preconscious formation of imaginaries by which we live

Quantum Reality and Theory of Śūnya

Siddheshwar Rameshwar Bhatt, 2019-03-30 The book deals with expounding the nature of Reality as it is understood in contemporary times in Quantum Physics It also explains the classical Indian theory of *nyāya* in its diverse facets Thereafter it undertakes comparison between the two which is an area of great topical interest It is a cross disciplinary study by erudite Indian and western scholars between traditional Indian knowledge system and contemporary researches in Physical sciences It points out how the theory of *nyāya* has many seminal ideas and theories in common with contemporary Quantum Physics The learned authors have tried to dissolve the mysteries of Quantum Physics and resolved its weird paradoxes with the help of theory of *nyāya* The issue of non separability or entanglement has been approached with the help of the Buddhist theory of *Pratītyasamutpāda* The paradoxical situation of wave particle duality has been explained with the help of Upaniadic theory of complementarity of the two opposites The measurement problem represented by Schrodinger's cat has been dealt with by resorting to two forms of the calculation of probabilities Some writers have argued for *nyāya* like non essentialist position to understand quantum reality To make sense of quantum theory some papers provide a happy symbiosis of technical understanding and personal meditative experience by drawing multifarious parallels This book will be of interest to philosophically inclined physicists and philosophers with interest in quantum mechanics

civilization along the Great River Valleys has allowed human imagination and dreams to express themselves through the construction of monuments to immortality Further to burning large part of the forests the discovery of combustion and exhumation of carbon from the Earth s hundreds of millions of years old fossil biospheres set the stage for an anthropogenic oxidation event affecting an abrupt shift in state of the atmosphere ocean cryosphere system The consequent ongoing extinction equals the past five great mass extinctions of species constituting a geological event horizon in the history of planet Earth

The Algorithm of Creation Nicholas Hagger, 2023-10-27 2023 SMN Book Prize Winner Significant Contribution to its Field The Algorithm of Creation is the last of Nicholas Hagger s quartet on the unity of the universe and humankind and follows *The Universe and the Light* 1993 *The One and the Many* 1999 and *The New Philosophy of Universalism* 2009 It offers an algebraic formula written out for him by Junzaburo Nishiwaki Japan s T S Eliot in Tokyo in October 1965 that sums up the wisdom of the East A A 0 Based on ancient Chinese thinking yin dark yang light the Tao it shows all opposites reconciled in the underlying unity of the One Void whose emptiness is also a fullness During a dinner at a conference of leading scientists at Jesus College Cambridge in September 1992 watched by Nobel physics prizewinner Roger Penrose Hagger reversed the formula to 0 A A when he wrote down the maths for his view of the origin and creation of the universe and showed the first two particles emerging from the Void s singularity influenced by the 1992 discovery of ripples in the cosmic microwave background radiation and the Presocratic Anaximander of Miletus In this work Hagger shows how this algebraic formula has worked as a universal algorithm 0 A A 0 Its many variations have acted as rules that have controlled the creation and development of the expanding universe its evolution and the rise of human history religion and science and its ultimate fate The formula is behind many of Hagger s works and his application of this algorithm to all human knowledge of the universe and all disciplines takes him to a first ever Theory of Everything which is set out at the end the algorithm of Creation containing 100 mathematical symbols reflecting all the variations that can be summed up in the above algorithm This startling achievement has been made possible by his Universalist cross disciplinary approach which focuses on the fundamental oneness of the universe and humankind and the unitive vision

A History of Physical Theories of Comets, From Aristotle to Whipple Tofigh

Heidarzadeh,2008-05-23 Although the development of ideas about the motion and trajectory of comets has been investigated piecemeal we lack a comprehensive and detailed survey of physical theories of comets The available works either illustrate relatively short periods in the history of physical cometology or portray a landscape view without adequate details The present study is an attempt to review with more details the major physical theories of comets in the past two millennia from Aristotle to Whipple My research however did not begin with antiquity The basic question from which this project originated was a simple inquiry about the cosmic identity of comets at the dawn of the astronomical revolution how did natural philosophers and astronomers define the nature and place of a new category of celestial objects comets after Brahe's estimation of cometary distances It was from this turning point in the history of cometary theories that I expanded my studies in both the pre modern and modern eras A study starting merely from Brahe and ending with Newton without covering classical and medieval thought about comets would be incomplete and leave the fascinating achievements of post Newtonian cometology unexplored
