Democracy's Mountain Ruth M. Alexander, 2023-09-26 At 14 259 feet Longs Peak towers over Colorado's northern Front Range A prized location for mountaineering since the 1870s Longs has been a place of astonishing climbing feats and unsurprisingly of significant risk and harm Careless and unlucky climbers have experienced serious injury and death on the peak while their activities equipment and trash have damaged fragile alpine resources As a site of outdoor adventure attracting mostly white people Longs has mirrored the United States tenacious racial divides even

into the twenty first century In telling the history of Longs Peak and its climbers Ruth M Alexander shows how Rocky Mountain National Park like the National Park Service NPS has struggled to contend with three fundamental obligations to facilitate visitor enjoyment protect natural resources and manage the park as a site of democracy Too often it has treated these obligations as competing rather than complementary commitments reflecting national discord over their meaning and value Yet the history of Longs also shows us how over time climbers the park and the NPS have attempted to align these obligations in policy and practice By putting mountain climbers and their relationship to Longs Peak and its rangers at the center of the story of Rocky Mountain National Park Alexander exposes the significant role outdoor recreationists have had as both citizens and privileged adventurers in shaping the peak s meaning use and management Since 2000 the park has promoted climber enjoyment and safety helped preserve the environment facilitated tribal connections to the park and attracted a more diverse group of visitors and climbers Yet Alexander argues more work needs to be done Alexander s nuanced account of Longs Peak reveals the dangers of undermining national parks fundamental obligations and presents a powerful appeal to meet them fairly and fully

Waves of Discontent Jacob F. H. Smith, 2025-08-21 After a period of relative calm in congressional elections prior to 2006 America has experienced a series of highly competitive volatile national elections Since then at least one of the US House US Senate and presidency has flipped party control often with a large House or Senate seat swing with the exception of the 2012 election In *Waves of Discontent* Jacob F H Smith argues that a pervasive feeling of displeasure in the American public has caused this increase in electoral volatility Conducting statistical analyses of a wide array of surveys Smith found that these feelings of displeasure translate to lower turnout among voters from the president s party and a higher percentage of independents voting for the other party Subsequently he conducted a content analysis of New York Times articles to look at the connection between unrest in American society and seat swings in congressional elections even before the existence of polling Examining the consequences of volatility in congressional elections reveals that political amateurs are more likely to win in wave years than in normal years Based on this data Smith presents a new theory about the policy process the policy doom loop in which frustration among voters at both the inability of Congress to pass policy and anger at policies that actually do pass results in even more churn in congressional elections *Waves of Discontent* offers some suggestions to promote constructive policymaking efforts in Washington to reduce frustration in the electorate
