[Exploration and Engineering](#) Erik M. Conway, 2015-03-30 Although the Jet Propulsion Laboratory in Pasadena California has become synonymous with the United States planetary exploration during the past half century its most recent focus has been on Mars Beginning in the 1990s and continuing through the Mars Phoenix mission of 2007 JPL led the way in engineering an impressive rapidly evolving succession of Mars orbiters and landers including roving robotic vehicles whose successful deployment onto the Martian surface posed some of the most complicated technical problems in space flight history In *Exploration and Engineering* Erik M Conway reveals how JPL engineers creative

technological feats led to major breakthroughs in Mars exploration He takes readers into the heart of the lab's problem solving approach and management structure where talented scientists grappled with technical challenges while also coping not always successfully with funding shortfalls unrealistic schedules and managerial turmoil Conway JPL's historian offers an insider's perspective into the changing goals of Mars exploration the ways in which sophisticated computer simulations drove the design process and the remarkable evolution of landing technologies over a thirty year period A masterpiece of research and writing *Quest History of Spaceflight Quarterly* A must for any reader of modern astronomy who wants insights into how the lab conducts its research solves problems and handles technological challenges *Midwest Book Review* A great tale of ambition mishap and recovery building on extensive archival research and interviews with JPL managers scientists and engineers to deliver a detailed overview of each mission's feats and failures *Exploration and Engineering* is a great book for everyone seriously interested in the struggles and achievements of JPL as NASA's centre for Mars exploration *Sky at Night* Erik M Conway is a historian of science and technology at the Jet Propulsion Laboratory California Institute of Technology He is the author of *Atmospheric Science at NASA A History* *The Cosmos* Jay M. Pasachoff, Alex Filippenko, 2013-08-12 An exciting introduction to astronomy the fourth edition of this book uses recent discoveries and stunning photography to inspire non science majors about the Universe Written by two highly experienced and engaging instructors each chapter has been fully updated with more than 200 new images throughout including recent images from space missions and the world's best observatories The newly redesigned text is organized as a series of stories each presenting the history of the field the observations made and how they fit within the process of science our current understanding and what future observations are planned Math is provided in boxes and easily read around making the book suitable for courses taking either mathematical or qualitative approaches New discussion questions encourage students to think widely about astronomy and the role science plays in our everyday lives and podcasts for each chapter aid studying and comprehension **NASA Historical Data Book, V. 7**, 1976 This volume of the NASA Historical Data Book is the seventh in the series that describes NASA's programs and projects Covering the years 1989 through 1998 it includes the areas of launch systems human spaceflight and space science continuing the volumes that addressed these topics during NASA's previous decades Each chapter presents information much of it statistical addressing funding management and details of programs and missions **NASA Historical Data Book: NASA launch systems, space transportation, human spaceflight, and space science, 1989-1998**, 1988 **The Interstellar Age** Jim Bell, 2015-02-24 The story of the men and women who drove NASA's Voyager spacecraft mission the farthest flung emissaries of planet Earth told by a scientist who was there from the beginning Voyager 1 left our solar system in 2012 its sister craft Voyager 2 did so in 2018 The fantastic journey began in 1977 before the first episode of *Cosmos* aired The mission was planned as a grand tour beyond the moon beyond Mars Jupiter Saturn Uranus and Neptune and maybe even into interstellar space The fact that it actually happened makes this

humanity's greatest space mission In *The Interstellar Age* award winning planetary scientist Jim Bell reveals what drove and continues to drive the members of this extraordinary team including Ed Stone Voyager's chief scientist and the one time head of NASA's Jet Propulsion Lab Charley Kohlhaas an orbital dynamics engineer who helped to design many of the critical slingshot maneuvers around planets that enabled the Voyagers to travel so far and the geologist whose Earth bound experience would prove of little help in interpreting the strange new landscapes revealed in the Voyagers astoundingly clear images of moons and planets Speeding through space at a mind bending eleven miles a second Voyager 1 and Voyager 2 are now beyond our solar system's planets the first man made objects to go interstellar By the time Voyager passes its first star in about 40 000 years the gold record on the spacecraft containing various music and images including Chuck Berry's Johnny B Goode will still be playable An ALA Notable Book of 2015
