Folas, 2009-12-01 Using an applications perspective Thermodynamic Models for Industrial Applications provides a unified framework for the development of various thermodynamic models ranging from the classical models to some of the most advanced ones Among these are the Cubic Plus Association Equation of State CPA EoS and the Perturbed Chain Statistical Association Fluid Theory PC SAFT These two advanced models are already in widespread use in industry and academia especially within the oil and gas chemical and polymer industries Presenting both classical models such as the Cubic Equations of State and more advanced models such as the CPA this book provides the critical starting point for choosing the most appropriate calculation method for accurate process simulations Written by two of the developers of these models Thermodynamic Models for Industrial Applications emphasizes model selection and model development and includes a useful which model for which application guide It also covers industrial requirements as well as discusses the challenges of thermodynamics in the 21st Century

Chemical Thermodynamics M L McGlashan, 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments

in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued
