## **String Art Number Guide:**

*Electronic String Art* Stephen Erfle, 2024-02-20 String art is a well known and popular activity that uses string a board and nails to produce artistic images although there are variations that use different modalities This activity is beloved because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds The downside of this highly tactile activity is that it is quite time consuming and rigid By contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously *Electronic String Art Rhythmic Mathematics* invites readers to use the author's digital resources available on the ESA website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change Readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections Features Readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections Sections are lessons that were created so that they could be digested in a single sitting These sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting An open ended inherently flexible teaching resource for elementary middle and high school level mathematics The most mathematically challenging sections or portions of a section are designated MA and may not be accessible to elementary and middle school readers Will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics Includes exercises solutions and many online digital resources These QR codes take you to these digital resources One takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in Section 25.5 The other takes you to the ESA web page with additional links to a variety of resources

*String Art* Rini Jose, 2021-11-03 About this Book Age Limit 10 This is a String Art tutorial book which has string art design and step by step instructions with proper diagrams to make the same This String Art tutorial book will help you to learn how to start making professional String Art This String Art book has String Art Images and diagrams for every mentioned steps This String Art tutorial book consist of many tips and tricks about the string art which will be very helpful even if you are at very beginner level These String Art ideas can be implemented anywhere Some of them are mentioned below String Art on Canvas String Art designs on paper String Art designs on wood String Art on cardboard String Art on wall String art on thermocol This String Art book contains procedures for how to make String Art design This String Art book has String Art designs step by step process which anyone can do String Art is a kind of very entertaining art which can be done by anyone at any age String Art designs can be used for various decorations some of them are mentioned below String Art designs for Table decorations String Art designs for Room decorations String Art designs for Wall
