*The Parmenidean Ascent* Michael Della Rocca,2020 The Parmenidean Ascent is a full throated and wide ranging defense of an extreme form of monism or the denial of all distinctions a form of monism rarely seen since the time of the pre Socratic philosopher Parmenides At once historically sensitive and deeply engaged with trends in recent and contemporary metaphysics philosophy of action epistemology and philosophy of language The Parmenidean Ascent aims on rationalist grounds and in a skeptical spirit to challenge the content of and to overturn the methods of much of contemporary philosophy

**Shared and Institutional Agency** Michael Bratman,2022 Our human lives involve remarkable forms of practical organization diachronic organization of individual activity small scale organization of shared action and the organization of institutions In this book Michael Bratman argues that the key to these multiple inter related forms of human practical organization is our capacity for planning agency Drawing on earlier work on the roles of planning agency in our human cross temporal and small scale social organization it focuses on the role of planning agency within our organized institutions whether a religious congregation a small business a professional association a city council a university a non profit organization a corporation a political party a legal system or a democratic state Shared and Institutional Agency draws on ideas inspired by H L A Hart that our organized institutions are rule guided and that to understand this we need a theory of social rules This book develops a planning theory of social rules and puts forth an organized institution as involving authority according social rules of procedure This supports a model of organized institutions that makes room for pluralistic divergence and leads to a model of institutional intention and institutional intentional agency The view that emerges sees our capacity for planning agency as a core capacity that underlies not only string quartets and informal social rules but also the

rule guided structure of organized institutions and institutional agency

**The Routledge Handbook of Collective Responsibility** Saba Bazargan-Forward, Deborah Tollefsen, 2020-04-19 The Routledge Handbook of Collective Responsibility comprehensively addresses questions about who is responsible and how blame or praise should be attributed when human agents act together Such questions include Do individuals share responsibility for the outcome or are individuals responsible only for their contribution to the act Are individuals responsible for actions done by their group even when they don't contribute to the outcome Can a corporation or institution be held morally responsible apart from the responsibility of its members The Handbook's 35 chapters all appearing here for the first time and written by an international team of experts are organized into four parts Part I Foundations of Collective Responsibility Part II Theoretical Issues in Collective Responsibility Part III Domains of Collective Responsibility Part IV Applied Issues in Collective Responsibility Each part begins with a short introduction that provides an overview of issues and debates within that area and a brief summary of its chapters In addition a comprehensive index allows readers to better navigate the entirety of the volume's contents The result is the first major work in the field that serves as an instructional aid for those in advanced undergraduate courses and graduate seminars as well as a reference for scholars interested in learning more about collective responsibility

**The Realizations of the Self** Andrea Altobrando, Takuya Niikawa, Richard Stone, 2018-09-11 Recent discussions of self realization have devolved into unscientific theories of self help However this vague and often misused concept is connected to many important individual and social problems As long as its meaning remains unclear it can be abused for social political and commercial malpractices To combat this issue this book shares perspectives from scholars of various philosophical traditions Each chapter takes new steps in asking what the meaning of self realization is both in terms of what it means to understand who or what one is and also in terms of how one can or should fulfill oneself The conceptual elucidations achieved from both theoretical and practical perspectives allow for a more mature awareness of how to deal with discourses on self realization and in any case can help to demystify the subject

**Building Better Beings** Manuel Vargas, 2013 Manuel Vargas presents a compelling and state of the art defense of moral responsibility in the face of growing philosophical and scientific skepticism about free will and accountability He shows how we can justify our responsibility practices and provides a normatively and naturalistically adequate account of agency blame and desert

Structural Rationality and Other Essays on Practical Reason Julian Nida-Rümelin, 2019-05-24 In this book the author shows that it is necessary to enrich the conceptual frame of the theory of rational choice beyond consequentialism He argues that consequentialism as a general theory of rational action fails and that this does not force us into the dichotomy teleology vs deontology The unity of practical reason can be saved without consequentialism In the process he presents insightful criticism of standard models of action and rational choice This will help readers discover a new perspective on the theory of rationality The approach is radical It transcends the reductive narrowness of instrumental rationality without denying its practical impact Actions do exist that are

outlined in accordance to utility maximizing or even self interest maximizing Yet not all actions are to be understood in these terms Actions oriented around social roles for example cannot count as irrational only because there is no known underlying maximizing heuristic The concept of bounded rationality tries to embed instrumental rationality into a form of life to highlight limits of our cognitive capabilities and selective perceptions However the agent is still left within the realm of cost benefit reasoning The idea of social preferences or meta preferences cannot encompass the plurality of human actions According to the author they ignore the plurality of reasons that drive agency Hence they coerce agency in fitting into a theory that undermines humanity His theory of structural rationality acknowledges lifeworld patterns of interaction and meaning

**Conversations on Human Action and Practical Rationality** Susana Cadilha, Carlos Mauro, Sofia Miguens, 2013-07-16  
This volume brings together leading scholars in the study of practical rationality and human action namely Alfred Mele Hugh McCann Michael Bratman George Ainslie Daniel Hausman and Joshua Knobe They were interviewed by the editors in a project based at the Institute of Philosophy of the University of Porto structured around the questions 1 In your view what are the most central or important problems in the philosophy of action 2 For some or all of the following action agency agent what do they contrast with most significantly 3 Which of these are liable to be rational irrational 4 In what sense is the thing to do to be decided by what is rational Are there limits of rationality 5 What explains action and how What is the role of deliberation in rationality 6 How is akrasia possible if you think it is 7 How do you think your own work has contributed to the field What are your plans for future research The outcome is of great interest not only for philosophers but also for economists psychologists political scientists and sociologists
